skills to use their time and energy more efficiently      *Cultural Capitalism* Bradley A. Gorski, 2025-03-15 *Cultural Capitalism* explores Russian literature's eager embrace of capitalism in the post Soviet era. When the Soviet Union fell, books were suddenly bought and sold as commodities. Russia's first bestseller lists brought attention and prestige. Even literary prizes turned to the market for legitimacy. The rise of capitalism entirely transformed both the economics and the aesthetics of Russian literature. By reconstructing the market's influence on everything from late Soviet paper shortages to the prose of neoimperialism, *Cultural Capitalism* reveals Russian literature's exuberant hopes for and deep disappointments in capitalism. Only a free market, it was hoped, could cure endemic book deficits and liberate literature from ideological constraints. But as the market came to dominate literature, it imposed an ideology of its own, one that directed literary development for decades. Through archival research, original interviews, and provocative readings of literary texts, Bradley A. Gorski immerses the reader in both the economic and aesthetic worlds of post-Soviet Russian literature to reveal a cultural logic dominated by capitalism. The Russian 1990s and early 2000s saw markets introduced, adopted, and debated at an accelerated pace, all against the backdrop of a socialist past, staging the polemics between capitalism and culture in high drama and sharp relief. But the market forces at the center of the post-Soviet transition are fundamental to cultural trends worldwide. By revealing the complexities of Russia's story, *Cultural Capitalism* mounts a critique that cuts across national borders and provides a new way of seeing culture in the post-1989 era worldwide.      *Reading at a Crossroads?* Rand J. Spiro, Michael

DeSchryver, Michelle Schira Hagerman, Paul M. Morsink, Penny Thompson, 2015-03-05 The Internet is transforming the experience of reading and learning through reading. Is this transformation effecting a radical change in reading processes as readers synthesize understandings from fragments across multiple texts? Or conversely is the Internet merely a new place to use the same reading skills and processes developed through experience with traditional print-based media? Are the changes in reading processes a matter of degree or are they fundamentally new? And if so, how must reading theory, research, and instruction adjust? This volume brings together distinguished experts from the fields of reading research, teacher education, educational psychology, cognitive science, rhetoric, and composition, digital humanities, and educational technology to address these questions. Every question is not answered in every chapter. How could they be? But every contributor has many thoughtful things to say about a subset of these important questions. Together they add up to a comprehensive response to the issues the field faces as it approaches what may well be, or not, a crossroads. A website devoted to extending discussion around the book in creative and disjunctive ways, [readingatacrossroads.net](http://readingatacrossroads.net), moves it beyond the printed page.      [The Reading Lives of Teens](#) Chin Ee Loh, 2024-11-04 In these changing times of global flows of media and technologies and reports of declining reading enjoyment, researchers, policymakers, and educators need to engage anew with essential issues of what counts as reading, what kinds of reading matter, and how to support teen reading engagement in school and out of school settings. Bringing together contributions from well-known and emerging adolescent literacy researchers from different

disciplinary perspectives this edited collection consolidates contemporary research on teens volitional print and digital reading whether in school or out of school contexts The first part of the book offers overviews of what teens are reading followed by chapters on community support on reading and new ways of researching teen reading With chapters from North America Europe Australia Asia and the Middle East the collection will offer multifaceted and complex insights into what how and why teens read in different contexts Reflection questions at the end of each chapter encourage readers to consider how the research can be applied in their own research policy and practice contexts This book will be of interest to researchers policymakers and educators who are invested in supporting adolescent engaged reading with evidence based policies and strategies
