Future David Anderson,2018-10-04 This is a book about the social political philosophical religious and economic presuppositions we have believed to be inherent truths that we are now discovering were built on geo ecological flaws We are being faced with an existential threat There is the possibility of human extinction And unlike threats in the past to all forms of life on the planet this one will not be determined by a random meteorite asteroid or natural planetary happening It will be self inflicted We are that species Where have we all gone wrong Could it be that certain elements in our thought process laboriously pieced together from the beginning of our bronze iron agricultural age are now working against us And if so what are those elements Finally the question is How could we the most clever and brilliant primate ever to evolve be bringing this on ourselves Is it that we have an evolutionary self destructive neurotic psychotic cranial imperfection And if this is the reason at what stage of our evolution did that imperfection occur Finally do you and I biologically psychologically neurologically have the ability to move away from that imperfection *Routledge Handbook of Public Diplomacy* Nancy
