Online Marxism Lost Century Historical Materialism:

Communism in the 21st Century Shannon Kurt Brincat, 2013-12-12 A compelling three volume exploration of the philosophical social and political facets of the theory and practice of communism within the conditions of 21st century world politics and late capitalism The world has changed significantly and so has communism This groundbreaking three volume series comprises contributions from over 30 experts that thoroughly address the past present and future of communism The entries assess the modern re articulation of the notion of communism and its potential emergence against the backdrop of recent historical conditions and contemporary world politics taking into account the ongoing global financial crisis recent revolutions throughout the Middle East Occupy protest events and anti globalization movements The first volume reexamines Marx's ideas from many distinct viewpoints while the second volume considers the numerous challenges facing existing communist parties including those in China Cuba North Korea and Vietnam The last volume explores the future of communist thought and practice in the context of the modern world and the recurrent crises of capitalism [Living in the End Times](#)

Slavoj Žižek, 2011-04-18 Economics *Living in the End Times* Slavoj Žižek, 2011-04-18 The celebrated philosopher explores the end of global capitalism at the hands of its key drivers the 4 riders of the apocalypse in this analysis of fierce brilliance Guardian There should no longer be any doubt global capitalism is fast approaching its terminal crisis Slavoj Žižek has identified the 4 horsemen of this coming apocalypse the worldwide ecological crisis imbalances within the economic system the biogenetic revolution and exploding social divisions and ruptures But if the end of capitalism seems to many like the end of the world how is it possible for Western society to face up to the end times In a major new analysis of our global situation Žižek argues that our collective responses to economic Armageddon correspond to the stages of grief ideological denial explosions of anger and attempts at bargaining followed by depression and withdrawal After passing through this zero point we can begin to perceive the crisis as a chance for a new beginning Slavoj Žižek shows the cultural and political forms of these stages of ideological avoidance and political protest from New Age obscurantism to violent religious fundamentalism Concluding with a compelling argument for the return of a Marxian critique of political economy Žižek also divines the wellsprings of a potentially communist culture from literary utopias like Kafka's community of mice to the collective of freak outcasts in the TV series *Heroes*

Marxism and America Christopher Phelps, Robin Vandome, 2021-06-08 In *Marxism and America* an accomplished group of scholars reconsiders the relationship of the United States to the theoretical tradition derived from Karl Marx In brand new essays that cover the period from the nineteenth century when Marx wrote for American newspapers to the present when a millennial socialism has emerged inspired by the presidential campaigns of Bernie Sanders the contributors take up topics ranging from memory of the Civil War to feminist debates over sexuality and pornography Along the way they clarify the relationship of race and democracy the promise and perils of the American political tradition and the prospects for class politics today *Marxism and America* sheds new light on old questions helping to

explain why socialism has been so difficult to establish in the United States even as it has exerted a notable influence in American thought

21st Century Sociology: A Reference Handbook Clifton D. Bryant, Dennis L. Peck, 2007 Publisher Description *Accounting, Accountants and Accountability* Norman Macintosh, 2013-04-03 In the business world recent years have seen a growing acknowledgement of the value of intangible assets rather than physical assets This has precipitated a crisis in the accounting industry the accounting representations relied upon for years can no longer be taken for granted Here Norman Macintosh argues that we now need to understand accounting in a different manner Offering several different ways of looking at accounting and accountants he draws upon the work of eminent thinkers such as Barthes Baudrillard Derrida Foucault Lyotard and Bakhtin In doing this he develops revolutionary insights into the nature of accounting pioneering the introduction of contemporary poststructuralist ideas into accounting theory and practice With a wide range of examples and case studies and now available in paperback for the first time this revolutionary new work will be essential reading for academic and professional accountants along with all those with an interest in the future of accounting

Rhetorical Bodies Jack Selzer, Sharon Crowley, 1999 What significance does the physical material body still have in a world of virtual reality and genetic cloning How do technology and postmodern rhetoric influence our understanding of the body And how can our discussion of the body affect the way we handle crises in public policy the politics of race and ethnicity issues of family values that revolve around sexual and gender identities the choices revolving around reproduction and genome projects and the spread of disease Leading scholars in rhetoric and communication as well as literary and cultural studies address some of the most important topics currently being discussed in the human sciences The essays collected here suggest the wide range of public arenas in which rhetoric is operative from abortion clinics and the World Wide Web to the media's depiction of illiteracy and the Donner Party These studies demonstrate how the discourse of AIDS prevention or Demi Moore's beautiful pregnancy call to mind the physical nature of being human and the ways in which language and other symbols reflect and create the physical world

The World Computer Jonathan Beller, 2021-01-22 In *The World Computer* Jonathan Beller forcefully demonstrates that the history of commodification generates information itself Out of the omnipresent calculus imposed by commodification information emerges historically as a new money form Investigating its subsequent financialization of daily life and colonization of semiotics Beller situates the development of myriad systems for quantifying the value of people objects and affects as endemic to racial capitalism and computation Built on oppression and genocide capital and its technical result as computation manifest as racial formations as do the machines and software of social mediation that feed racial capitalism and run on social difference Algorithms derived from for profit management strategies conscript all forms of expression language image music communication into the calculus of capital such that even protest may turn a profit Computational media function for the purpose of extraction rather than ameliorating global crises and financialize every expressive act converting each utterance into a wager Repairing this ecology of

exploitation Beller contends requires decolonizing information and money and the scripting of futures wagered by the cultural legacies and claims of those in struggle **Twenty-first Century Anarchism** Jon Purkis, James Bowen, 1997 The contributors to this collection analyse anarchic processes today and offer a vision of how subversion will appear in the next century **European Intellectual History Since 1789** Roland N. Chall, 2004 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers
