Towards A New Social Order? Real Democracy, Sustainability & Peace Patrick Holz, 2018-05-15 This contribution argues that a long established social order has been in place since the first stratified societies in the Near Middle East which unavoidably comes with substantial economic political and environmental repercussions Part I of the book dissects the various facets of this order which is termed the social dominance paradigm while in Part II a fundamentally different order the peace paradigm is introduced The latter rests on real democracy in the Athenian sense sustainability and peace As such both paradigms function as vehicles for further analysis and research while the peace paradigm also provides a rough plan for the implementation of transformational change Typically political economic social and environmental research seeks to increase specialized knowledge Here however the overall intent is to utilize interdisciplinary evidence and connect the dots between a number of defining features within seemingly modern societies The argument is that these are in fact not modern at all but follow an ancient template of power control and coordination concentrated in the hands of the few Potentially this contribution can function as a trans disciplinary methodological framework as well as an information hub for researchers in the fields of political and social sciences history anthropology evolutionary biology organization and peace studies Practitioners who are interested in fundamental social change may also find the issues raised to be of interest As such this book provides a generalist evidence based discussion of a multi disciplinary nature that may pique the interest of both experts and amateurs alike
