**Onto-Cartography** Levi R. Bryant, 2014-03-17 Defends and transforms naturalism and materialism to show how culture itself is formed by nature Bryant endorses a pan ecological theory of being arguing that societies are ecosystems that can only be understood by considering nonhuman material agencies such as rivers and mountain ranges alongside signifying agencies such as discourses narratives and ideologies

### **The Philosophy of Documentary Film** David

LaRocca, 2016-12-20 The spirit that founded the volume and guided its development is radically inter and transdisciplinary Dispatches have arrived from anthropology communications English film studies including theory history criticism literary studies including theory history criticism media and screen studies cognitive cultural studies narratology philosophy poetics politics and political theory and as a special aspect of the volume theorist filmmakers make their thoughts known as well Consequently the critical reflections gathered here are decidedly pluralistic and heterogeneous inviting not bracketing or partitioning the dynamism and diversity of the arts humanities social sciences and even natural sciences in so far as we are biological beings who are trying to track our cognitive and perceptual understanding of a nonbiological thing namely film whether celluloid based or in digital form these disciplines so habitually cordoned off from one another are brought together into a shared conversation about a common object and domain of investigation This book will be of interest to theorists and practitioners of nonfiction film to emerging and established scholars contributing to the secondary literature and to those who are intrigued by the kinds of questions and claims that seem native to nonfiction film and who may wish to explore some critical responses to them written in engaging language

### **Quentin Meillassoux** Graham Harman, 2015-01-12 In this

expanded edition of his landmark 2011 work on Meillassoux Graham Harman covers new materials not available to the Anglophone reader at the time of the first edition Along with Meillassoux's startling book on Mallarmé's poem *Un coup de des jamais n'abolira le hasard* Harman discusses several new English articles by Meillassoux including his controversial April 2012 Berlin lecture and its critique of subjectalism Freshly called to a professorship at the Sorbonne Meillassoux's star has continued to rise This expanded edition of the only book on Meillassoux remains the best introduction to one of Europe's most promising thinkers

### **Atlas of Material Worlds** Matthew Seibert, 2021-08-17

Atlas of Material Worlds is a highly designed narrative atlas illustrating the agency of nonliving materials with unique ubiquitous and often hidden influence on our daily lives Employing new materialism as a jumping off point it examines the increasingly blurry lines between the organic and inorganic engaging the following questions What roles do nonliving materials play Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded If so does this material agency change our understanding of the social structures ecologies economies cosmologies technologies and landscapes that surround us And perhaps most importantly why does material agency matter This is the story of the world's driest nonpolar desert pink

flamingos and cerulean blue lithium ponds industrial shipping logistics pudding like jiggling substrates and monuments of mud galactic bodies radioactive sheep and the yellowcake of uranium Put simply this book dares readers to see the world anew from material up Atlas of Material Worlds offers this new relationship to our host environment in a time of mounting crises accelerating climate change ballooning socioeconomic inequality and rising toxic nationalism uniquely telling materialist stories for practitioners and students in landscape architecture and other built environment disciplines

Adventures in Transcendental Materialism Adrian Johnston, 2014-03-17 Critically engaging with thinkers including Slavoj Žižek Alain Badiou Catherine Malabou Jean Claude Milner Martin Hagglund William Connolly and Jane Bennett Johnston formulates a materialist and naturalist account of subjectivity that does full justice to human beings as irreducible to natural matter alone *The Oxford Handbook of New Science Fiction Cinemas* J. P. Telotte, 2023 Essays in The Oxford Handbook of New Science Fiction Cinemas address the impact of new theoretical approaches and recent cultural attitudes on a changing science fiction cinema Essay topics include but are not limited to Afrofuturism biopunk science fiction feminist science fiction heterotopic spaces steampunk cinema ethno Gothic films superhero cinema queer theory and posthumanism *Form and Object* Tristan Garcia, 2014-03-17 What is a thing What is an object Tristan Garcia decisively overturns 100 years of Heideggerian orthodoxy about the supposedly derivative nature of objects to put forward a new theory of ontology that gives us deep insights into the world and our place in it **Postmodernism in Pieces** Matthew Mullins, 2016-07-01

Postmodernism in Pieces performs a postmortem on what is perhaps the most contested paradigm in literary studies In the wake of a critical consensus proclaiming its death Matthew Mullins breaks postmodernism down into its most fundamental orthodoxies and reassembles it piece by piece in light of recent theoretical developments in Actor Network Theory object oriented philosophy new materialism and posthumanism In the last two decades postmodernism has collapsed under the weight of the very phenomena it set out to deconstruct language whiteness masculinity class the academy Recasting these categories as social constructs has done little to alleviate their material effects Through detailed analyses of everyday objects in novels by Leslie Marmon Silko Toni Morrison Jonathan Lethem John Barth David Foster Wallace Don DeLillo and Julia Alvarez Mullins argues that what makes fiction postmodern is its refusal to accept social explanations for problems facing a given culture and its tendency instead to examine everyday things and people as constituent pieces of larger networks The result is a new story of postmodernism one that reimagines postmodernism as a starting point for a new mode of literary history rather than a finish line for modernity *Fields of Sense* Markus Gabriel, 2015-01-14 It is still a widespread assumption that metaphysics and ontology deal with roughly the same questions They are supposed to be concerned with the fundamental nature of reality and to give an account of the meaning of existence or being in line with the broadest possible metaphysical assumptions Against this Markus Gabriel proposes a radical form of ontological pluralism that divorces ontology from metaphysics understood as the most fundamental theory of absolutely everything the world He argues that the

concept of existence is incompatible with the existence of the world and therefore proposes his innovative no world view In the context of recent debates surrounding new realism and speculative realism Gabriel also develops the outlines of a realist epistemological pluralism His idea here is that there are different forms of knowledge that correspond to the plurality of fields of sense that must be acknowledged in order to avoid the trap of metaphysics *End of Phenomenology* Tom Sparrow, 2014-06-04 Shows how speculative realism is replacing phenomenology as the beacon of realism in contemporary Continental philosophy

**The Routledge Companion to Cyberpunk Culture** Anna McFarlane, Lars Schmeink, Graham Murphy, 2019-11-28 In this companion an international range of contributors examine the cultural formation of cyberpunk from micro level analyses of example texts to macro level debates of movements providing readers with snapshots of cyberpunk culture and also cyberpunk as culture With technology seamlessly integrated into our lives and our selves and social systems veering towards globalization and corporatization cyberpunk has become a ubiquitous cultural formation that dominates our twenty first century techno digital landscapes The Routledge Companion to Cyberpunk Culture traces cyberpunk through its historical developments as a literary science fiction form to its spread into other media such as comics film television and video games Moreover seeing cyberpunk as a general cultural practice the Companion provides insights into photography music fashion and activism Cyberpunk as the chapters presented here argue is integrated with other critical theoretical tenets of our times such as posthumanism the Anthropocene animality and empire And lastly cyberpunk is a vehicle that lends itself to the rise of new futurisms occupying a variety of positions in our regionally diverse reality and thus linking as much as differentiating our perspectives on a globalized technoscientific world With original entries that engage cyberpunk s diverse angles and its proliferation in our life worlds this critical reference will be of significant interest to humanities students and scholars of media cultural studies literature and beyond

**Materialist Media Theory** Grant Bollmer, 2019-09-19 Our technologies rely on an ever expanding infrastructure of wires routers servers and hard drives a proliferation of devices that reshape human interaction and experience prior to conscious knowledge Understanding these technologies requires an approach that foregrounds media as an agent that collaborates in the production of the world beyond content or representation Materialist Media Theory provides an accessible synthetic account of the cutting edge of the theoretical humanities examining a range of approaches to media s physical infrastructural role in shaping culture space time cognition and life itself More than a mere introduction Materialist Media Theory provides a critical intervention into matter and media of interest to students and researchers in media studies communication cultural studies visual culture and beyond Media determine our reality and any politics of media must begin by foregrounding the media s materiality

**Making Use of Deleuze in Planning** Gareth Abrahams, 2016-10-04 Making Use of Deleuze in Planning translates and re creates some of Gilles Deleuze s most abstract philosophical concepts to form a new practicable planning assessment tool It shows what his philosophy can do for planning theory as well as planning assessment practice and in doing so sets out a

pragmatic approach to Deleuzian studies one that helps form bridges between ontological problems and the problems found in professional practice It also breaks new ground in assessment methodology by challenging the essentialist ideas underpinning assessment methods like BREEAM and setting out and testing a new form of non essentialist assessment named SIAM The book argues that Deleuze s philosophy can be made useful to planning as long as one is prepared to adapt and re create his key ontological concepts to respond to the specific demands of the field     Object-Oriented Cartography  
Tania Rossetto,2019-05-16 Object Oriented Cartography provides an innovative perspective on the changing nature of maps and cartographic study Through a renewed theoretical reading of contemporary cartography this book acknowledges the shifted interest from cartographic representation to mapping practice and proposes an alternative consideration of the thingness of maps Rather than asking how maps map onto reality it explores the possibilities of a speculative realist map theory by bringing cartographic objects to the foreground Through a pragmatic perspective this book focuses on both digital and nondigital maps and establishes an unprecedented dialogue between the field of map studies and object oriented ontology This dialogue is carried out through a series of reflections and case studies involving aesthetics and technology ethnography and image theory and narrative and photography Proposing methods to further develop this kind of cartographic research this book will be invaluable reading for researchers and graduate students in the fields of Cartography and Geohumanities
