 Stability of the Mexican State **Autocracy** G. Tullock, 2012-12-06 My first serious thought about a scientific approach to
 politics was in Communist China When the Communists seized China the American Department of State which was planning
 to recognize them left its entire diplomatic establishment in place At the time I was a Vice Consul in Tientsin so I found
 myself living under the Communists While the Department of State was planning on recognizing the Communists the
 Communist plans were obscure In any event they weren t going to recognize us in the Consulate General until formal
 relations were established between the two governments so I had a great deal of leisure As a man who then intended to
 spend his life as a political officer in the Department of State I decided to fill in this time by reading political science I rapidly
 realized not only that the work was rather unsatisfactory from a scientific standpoint but also that it didn t seem to have very
 much relevance to the Communist government under which I was then living I was unable to solve the problem at the time
 and after a number of vicissitudes which included service in Hong Kong and South Korea neither of which was really a model
 of democracy I resigned and switched over to an academic career primarily concerned with that mixture of economics and
 political science which we call Public Choice Most of my work in Public Choice has dealt with democratic governments
