## **Michelangelo Famous Artists:**

**Michelangelo and His Influence** Paul Joannides, Michelangelo Buonarroti, 1996 The drawings featured in this volume are from the Royal Collection at Windsor Castle Eighteen sheets are supreme examples of Michelangelo's draftsman'ship fifty are by his contemporaries and successors including Raphael Sebastiano del Piombo Perino del Vaga Pordenone and Annibale Carracci and demonstrate Michelangelo's impact on their technique style and imagery Among the other artists represented are Alessandro Allori Bartolommeo Ammanati Baccio Leonardo, Michelangelo and Raphael Charles River Editors, 2018-01-08 Includes pictures of important people and places as well as the artists' most famous works Discusses the relationships between the artists Includes a Bibliography on each man for further reading The Renaissance spawned the use of the label Renaissance Man to describe a person who is extremely talented in multiple fields and no discussion of the Renaissance is complete without the original Renaissance Man Leonardo da Vinci Indeed if 100 people are asked to describe Leonardo in one word they might give 100 answers As the world's most famous polymath and genius Leonardo found time to be a painter sculptor architect musician scientist mathematician engineer inventor anatomist geologist cartographer botanist and writer It would be hard to determine which field Leonardo had the greatest influence in His Mona Lisa and The Last Supper are among the most famous paintings of all time standing up against even Michelangelo's work But even if he was not the age's greatest artist Leonardo may have conducted his most influential work in other fields His emphasis on the importance of Nature would influence Enlightened philosophers centuries later and he sketched speculative designs for gadgets like helicopters that would take another 4 centuries to create Leonardo's vision and philosophy were made possible by his astounding work as a mathematician engineer and scientist At a time when much of science was dictated by Church teachings Leonardo studied geology and anatomy long before they truly even became scientific fields and he used his incredible artistic abilities to sketch the famous Vitruvian Man linking art and science together It's possible that Michelangelo is the most famous artist in history but it's also possible that he's an underrated artist The vast influence of his career is reflected by the fact that he is not only known for his own art but has also come to embody an entire epoch of Western art Along with Leonardo da Vinci there are no other artists who so fully capture the spirit of scientific and artistic discovery that characterized art during the late 15th and early 16th centuries Moreover Michelangelo's career is distinguished from that of his peers through his seamless ability to work within different art forms receiving acclaim regardless of the medium After first rising to fame as a sculptor he also painted and served as an architect and since his death Michelangelo has also become decorated for his prolific output as a poet The diversity and high standard of his work no matter the medium make it difficult to even arrive at a most famous work People can make a compelling argument for at least three works the statue of David 1501-1504 the ceiling of the Sistine Chapel 1508-1512 or the design for St Peter's Basilica worked on from 1546 through his death That the same artist produced these canonical monuments of Western art is

remarkable but that each was made through a different medium defines Michelangelo as a sui generis talent Although Raphael was perhaps the most favored artist of the Italian Renaissance his reputation has since been surpassed by famous contemporaries like Leonardo da Vinci and Michelangelo To this day it is difficult to think of Raphael without considering his artistic rivals and comparing the artwork between Raphael and his contemporaries illuminates Raphael s artistic style and the reception surrounding his work In many ways his art synthesized the styles of other artists Raphael s artwork was not produced in a vacuum and his career reflects the rise of the artist as a culturally significant figure while also preserving the grandeur of the church Even if he lacked the innovation of Leonardo or Michelangelo Raphael was every bit as renowned during the time period and an analysis of his life explains his mass appeal and cultural significance *Michelangelo* Jen Green,1993 Traces the life and artistic achievement of the Italian painter and sculptor Michelangelo Michelangelo Life Drawings Michelangelo Buonarroti,1979-01-01 Throughout his long life Michelangelo Buonarroti 1475 1564 never ceased to practice drawing with pen pencil or chalk In the 60 years of creative activity encompassed by this volume the artist produced scores of sketches drawings and studies nudes heads figure studies Madonnas anatomical drawings studies of children and animals mythical representations and religious works This book reproduces 46 of his finest drawings embodying most of his artistic themes and techniques and executed in his characteristic media of pen and ink and red and black chalk The extraordinary strength grace and clarity of his renderings are beautifully illustrated on every page The compositions carefully reproduced on fine quality paper range from youthful studies modeled after ancient sculpture and early Renaissance frescoes to the otherworldly religious creations of his old age Many are preliminary drawings executed in connection with some of his most important commissions the marble David of 1501 04 the famous cartoon of 1504 for the projected fresco in the Palazzo Vecchio The Battle of Cascina the paintings on the vaulted ceiling of the Sistine Chapel executed 1508 12 and the imposing fresco of The Last Judgment in the same chapel executed 1535 14 as well as several of the more highly finished allegorical presentation drawings of the early 1530s In some cases e g The Battle of Cascina the drawings are all that remain of a lost masterpiece All drawings are accompanied by brief descriptive captions including date medium size and current location

**Michelangelo and the Reform of Art** Alexander Nagel,2000-09-11 Michelangelo was acutely conscious of living in an age of religious crisis and artistic change and for him the two issues were related Michelangelo and the Reform of Art explores Michelangelo s awareness of artistic tradition as a means of understanding his relation to the profound religious uncertainty of the sixteenth century Concentrating on Michelangelo s lifelong preoccupation with the image of the dead Christ Alexander Nagel studies the artist s associations with reform minded circles in early sixteenth century Italy and reveals his sustained concern over the fate of religious art **Life of Michelangelo** Giorgio Vasari,2003 Presents an English translation of the sixteenth century text in which the author a friend confidante and colleague of Michelangelo examines the life and work of the famous Italian Renaissance artist *The Top 5 Greatest Artists* Charles River

Editors, 2013-09-10 Includes pictures of important people and places as well as the artists most famous works Discusses the relationships between the artists Includes a Bibliography on each artist for further reading It would be hard to determine which field Leonardo had the greatest influence in His Mona Lisa and The Last Supper are among the most famous paintings of all time standing up against even Michelangelo's work But even if he was not the age's greatest artist Leonardo may have conducted his most influential work was done in other fields His emphasis on the importance of Nature would influence Enlightened philosophers centuries later and he sketched speculative designs for gadgets like helicopters that would take another 4 centuries to create It's possible that Michelangelo is the most famous artist in history but it's also possible that he's an underrated artist The vast influence of his career is reflected by the fact that he is not only known for his own art but has also come to embody an entire epoch of Western art Along with Leonardo da Vinci there are no other artists who so fully capture the spirit of scientific and artistic discovery that characterized art during the late 15th and early 16th centuries Moreover Michelangelo's career is distinguished from that of his peers through his seamless ability to work within different art forms receiving acclaim regardless of the medium After first rising to fame as a sculptor he also painted and served as an architect and since his death Michelangelo has also become decorated for his prolific output as a poet The diversity and high standard of his work no matter the medium make it difficult to even arrive at a most famous work Raffaello Sanzio da Urbino known across the world simply by the name Raphael stands as one of the main pillars of the High Renaissance an iconic example of the balance between spirituality and Humanistic inquiry that characterized the time period Although he lived just 37 years his career produced an amazingly rich output and he completed more works than many artists do over careers spanning twice the length At the same time Raphael's art combined central tropes associated with the Renaissance while remaining remarkably original Vincent van Gogh is undoubtedly one of the most famous artists of all time and though the critical establishment may not consider him the greatest artist who ever lived there may be no artist with whom the public has a greater familiarity Unfortunately a great deal of that familiarity comes from the circumstances leading up to his death and the manner in which they have been linked to his painting career In 1882 Vincent would hauntingly and somewhat prophetically write to his brother Theo What am I in the eyes of most people a nonentity an eccentric or an unpleasant person somebody who has no position in society and will never have in short the lowest of the low All right then even if that were absolutely true then I should one day like to show by my work what such an eccentric such a nobody has in his heart In their biography of Pablo Picasso Hans Ludwig and Chris Jaffe note that for him art was always adventure To find is the thing Indeed there is perhaps no artist who produced more art than Picasso whose enormous oeuvre which spanned most of his 91 year life contained a countless number of paintings and drawings Picasso also worked in other mediums as well notably sculpture and lithography and his constant experimentation with form makes him a useful case study through which to chart the growth of Modernism as an artistic movement and many of the artistic trends that would dominate the 20th century
