Information Ethics, Globalization and

Citizenship Toni Samek, Lynette Shultz, 2017-04-10 The boundaries of citizenship have been blurred by global information systems while the public and private spheres have been reshaped through globalization and colonialism and capitalism This collection of new essays explores information and citizenship in the digital age from a range of perspectives presenting cautionary tales along with possibilities for decolonizing digital information and literacy Topics include Wikileaks and the dissolution of information ethical issues for teachers policy makers and librarians and creating safe spaces through ethical librarianship

GM Food on Trial Les Levidow, Susan Carr, 2009-12-04 This book examines European institutions being put on trial for how their regulatory procedures evaluate and regulate genetically modified products Levidow highlights how public controversy created a legitimacy crisis leading to national policy changes and demands in turn stimulating changes in EU agbiotech regulations as a strategy to regain legitimacy

Risk, Environment and Modernity Scott Lash, Bronislaw Szerszynski, Brian Wynne, 1996-04-05 This wide ranging and accessible contribution to the study of risk ecology and environment helps us to understand the politics of ecology and the place of social theory in making sense of environmental issues The book provides insights into the complex dynamics of change in risk societies

Engineering the Climate Christopher J. Preston, 2012-06-28 Engineering the Climate The Ethics of Solar Radiation Management discusses the ethical issues associated with deliberately engineering a cooler climate to combat global warming Climate engineering also known as geoengineering has recently experienced a surge of interest given the growing likelihood that the global community will fail to limit the temperature increases associated with greenhouse gases to safe levels Deliberate manipulation of solar radiation to combat climate change is an exciting and hopeful technical prospect promising great benefits to those who are in line to suffer most through climate change At the same time the prospect of geoengineering creates huge controversy Taking intentional control of earth's climate would be an unprecedented step in environmental management raising a number of difficult ethical questions One particular form of geoengineering solar radiation management SRM is known to be relatively cheap and capable of bringing down global temperatures very rapidly However the complexity of the climate system creates considerable uncertainty about the precise nature of SRM's effects in different regions The ethical issues raised by the prospect of SRM are both complex and thorny They include 1 the uncertainty of SRM's effects on precipitation patterns 2 the challenge of proper global participation in decision making 3 the legitimacy of intentionally manipulating the global climate system in the first place 4 the potential to sidestep the issue of dealing with greenhouse gas emissions and 5 the lasting effects on future generations It has been widely acknowledged that a sustained and scholarly treatment of the ethics of SRM is necessary before it will be possible to make fair and just decisions about whether or how to proceed This book including essays by 13 experts in the field of ethics of geoengineering is intended to go some distance towards providing that treatment

Big Data Surveillance and Security Intelligence David Lyon, David Murakami Wood, 2020-12-01 Intelligence gathering is in a state of flux Enabled by massive computing power new modes of communications analysis now

touch the lives of citizens around the globe not just those considered suspicious or threatening Big Data Surveillance and Security Intelligence reveals the profound shift to big data practices that security agencies have made in recent years as the increasing volume of information from social media and other open sources challenges traditional intelligence gathering Working together the Five Eyes intelligence partners Australia Canada New Zealand the United Kingdom and the United States are using new methods of data analysis to identify and pre empt risks to national security But at what cost to civil liberties human rights and privacy protection In this astute collection leading academics civil society experts and regulators debate the pressing questions raised by security intelligence and surveillance in Canada in the age of big data

Communicating Biological Sciences Richard Elliott, 2016-05-23 Recent scandals in the biosciences have highlighted the perils of communicating science leading many observers to ask questions about the pressures on scientists and the media to hype up claims of scientific breakthroughs Journalists science writers and scientists themselves have to report complex and rapidly developing scientific issues to society yet work within conceptual and temporal constraints that shape their communication To date there has been little reflection on the ethical implications of science writing and science communication in an era of rapid change Communicating Biological Sciences discusses the ethics of science communication in light of recent developments in biotechnology and biomedicine It focuses on the role of metaphors in the creation of visions and the framing of scientific advances as well as their impact on patterns of public acceptance and rejection trust and scepticism Its rigorous investigation will appeal not only to science writers and scientists but also to scholars of sociology science and technology studies media and journalism
