**Out Where the West Begins, Volume 2** Philip F. Anschutz, 2017-12-15 In 1790 it was not a given that the young United States bruised and healing from its struggle for independence and populated by fewer than 4 million inhabitants would even survive much less flourish But the great adventure that came next the exploration and settlement of the lands lying to the west and stretching to the Pacific Ocean would build a nation where only a patchwork of eastern seaboard colonies had existed before The first book in this series Out Where the West Begins Profiles

Visions Strategies of Early Western Business Leaders profiled fifty individuals who made significant contributions to the economic development of a young nation This second volume follows the saga of more than one hundred influential men and women political and military leaders religious thinkers civil rights proponents suffragettes African American pioneers writers and artists explorers and surveyors architects inventors innovators medical professionals and conservationists who together wove the story of early western frontier America The engaging account of their lives forms a unique tapestry of human experience In the words of the author Understanding our distinctive past helps us better comprehend who we are now and who we wish to become

**The Aesthetics of Island Space** Johannes Riquet, 2019-12-18 Oxford Textual Perspectives is a series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works The Aesthetics of Island Space discusses islands as central figures in the modern experience of space It examines the spatial poetics of islands in literary texts from Shakespeare's *The Tempest* to Ghosh's *The Hungry Tide* in the journals of explorers and scientists such as James Cook and Charles Darwin and in Hollywood cinema It traces the ways in which literary and cinematic islands have functioned as malleable spatial figures that offer vivid perceptual experiences as well as a geopoetic oscillation between the material energies of words and images and the energies of the physical world The chapters focus on America's island gateways Roanoke and Ellis Island visions of tropical islands Tahiti and imagined South Sea islands the islands of the US Canadian border region in the Pacific Northwest and the

imaginative appeal of mutable islands It argues that modern voyages of discovery posed considerable perceptual and cognitive challenges to the experience of space and that these challenges were negotiated in complex and contradictory ways via poetic engagement with islands Discussions of island narratives in postcolonial theory have broadened understanding of how islands have been imagined as geometrical abstractions bounded spaces easily subjected to the colonial gaze There is however a second story of islands in the Western imagination which runs parallel to this colonial story In this alternative account the modern experience of islands in the age of discovery went hand in hand with a disintegration of received models of understanding global space Drawing on and rethinking post phenomenological geocritical and geopoetic theories The Aesthetics of Island Space argues that the modern experience of islands as mobile and shifting territories implied a dispersal fragmentation and diversification of spatial experience and it explores how this disruption is registered and negotiated by both non fictional and fictional responses

**Home Lands** Virginia Scharff, Carolyn Brucken, 2010-05-18 The storybook history of the American West is a male dominated narrative of drifters dreamers hucksters and heroes a tale that relegates women assuming they appear at all to the distant background Home Lands How Women Made the West upends this view to remember the West as a place of homes and habitations brought into being by the women who lived there Virginia Scharff and Carolyn Brucken consider history's long span as they explore the ways in which women encountered and transformed three different archetypal Western landscapes the Rio Arriba of northern New Mexico the Front Range of Colorado and the Puget Sound waterscape This beautiful book companion volume to the Autry National Center's pathbreaking exhibit is a brilliant aggregate of women's history the history of the American West and studies in material culture While linking each of these places peoples to one another over hundreds even thousands of years Home Lands vividly reimagines the West as a setting in which home has been created out of differing notions of dwelling and family and differing concepts of property community and history Copub Autry National Center of the American West
