The Happiness Effect Donna Freitas, 2017-01-02 Sexting Cyberbullying Narcissism Social media has become the dominant force in young people's lives and each day seems to bring another shocking tale of private pictures getting into the wrong hands or a lament that young people feel compelled to share their each and every

thought with the entire world Have smartphones and social media created a generation of self obsessed egomaniacs Absolutely not Donna Freitas argues in this provocative book And she says these alarmist fears are drawing attention away from the real issues that young adults are facing Drawing on a large scale survey and interviews with students on thirteen college campuses Freitas finds that what young people are overwhelmingly concerned with what they really want to talk about is happiness They face enormous pressure to look perfect online not just happy but blissful ecstatic and fabulously successful Unable to achieve this impossible standard they are anxious about letting the less than perfect parts of themselves become public Far from wanting to share everything they are brutally selective when it comes to curating their personal profiles and worry obsessively that they might unwittingly post something that could come back to haunt them later in life Through candid conversations with young people from diverse backgrounds Freitas reveals how even the most well adjusted individuals can be stricken by self doubt when they compare their experiences with the vast collective utopia that they see online And sometimes as on anonymous platforms like Yik Yak what they see instead is a depressing cesspool of racism and misogyny Yet young people are also extremely attached to their smartphones and apps which sometimes bring them great pleasure It is very much a love hate relationship While much of the public s attention has been focused on headline grabbing stories the everyday struggles and joys of young people have remained under the radar Freitas brings their feelings to the fore in the words of young people themselves The Happiness Effect is an eye opening window into their first hand experiences of social media and its impact on them
