General

This section deals with the specification of the MF 508 Tractor. The tractor is available in two models, one with standard transmission and the other with reversomatic transmission. The reversomatic transmission incorporates a torque converter in place of the usual clutch. The torque converter is operated by two pedals and produces either forward or reverse motion without rear selection. This method allows rapid backward and forward shuttling between lorry and work pile. Standard equipment includes full power steering, five plate wet brakes, full lighting, heater and hazard warning lights.
