It explores essential topics such as infant feeding, smoking, mental health, behaviour change, models for health promotion, violence and abuse, and sexual health promotion, and includes seven entirely new chapters. These new additions reflect the need to improve inequalities in care for service users from a range of backgrounds such as for clients from racially diverse communities, clients from the LGBT communities, and migrant and displaced clients. Further chapters such as those looking at public health in a global world, vaccinations in pregnancy, and self care for midwives meet needs highlighted by the recent pandemic and its aftermath. Text boxes throughout ensure the text is accessible and user friendly, and case studies and summaries put the material in a practical context. Further reading sections encourage readers to further research and reflect on their own practice. This textbook is essential reading for all midwives, student midwives, health visitors, and other health care professionals in maternity care education and practice.
