Standards & Objectives

Overarching Question: How does sound energy travel?

Standard Addressed:

- 4-PS3-2 Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.

Objectives:

- Station 1
To make observations and provide evidence that a sound is a vibration.
- Station 2
To make observations and provide evidence that sound travels in all directions.
- To understand that sound waves travel occur through compression and rarefaction.
- Station 3
To make observations and find evidence that increasing force/energy increases the amplitude.
- To make observations and find evidence that when sound waves travel through a medium the waves are longer, and the sound produced has a lower frequency.
- To make observations and find evidence that dense materials conduct sound better than less dense materials and that sound bounces off flat surfaces better than bumpy and/or rough surfaces.
- To make observations and find evidence that sound travels best through solids, better through liquids, and worst through gases.

1. What is heat?
 2. How does heat travel?
