**The End of Rejection** Chris Hayward, 2007-02-05 We all want to be loved Yet almost from the moment we take our first breaths we find ourselves dealing with rejection The causes of rejection date back to the beginning of the world with Adam and Eve By understanding the origin of rejection its influence on our lives and our own role in coping with it we will be on the road to wholeness and freedom Learn how fear of rejection subtly manifests itself in our lives as perfectionism and withdrawal Find out why church splits divorce and racial prejudice are all an outgrowth of rejection Learn why self rejection may lead to depression and even suicide Discover how coming to grips with rejection can release us to be the complete person we were meant to be in our marriages families workplaces and ministries

**The Tri-State Medical Journal and Practitioner**, 1898 Casualties of

Causality Peter Dahler-Larsen, 2022-11-07 This book offers a critique of the present status of the concept of causality in the social sciences The Causality Syndrome consists of a belief in causal studies as more important than other studies a narrow definition of causality and rules of thumb regarding how to make causal claims The book argues that the present dominance of this syndrome has considerable downsides and presents a challenge to social science The book dissects the many interconnected ideas which undergird this syndrome and offers an intellectual home for advanced students researchers and others who are concerned about the present dominance of The Causality Syndrome The book critically discusses whether causality deserves the central position in social science that its advocates desire The text shows how methodological rules about causal inference are used to protect causal studies from critique even in situations where these rules are not followed It is argued that institutionalization of these rules as symbols of good and trustworthy social science is highly problematic and comes with a price One of the casualties of causality is that there is less motivation to study complex and pressing issues in society which do not lend themselves to causal study designs The sections are short The argument unfolds in a lively engaged form with examples from many fields including public health evaluation and organizational studies The case examples include classical experiments as well as contemporary research e g studies of the effectiveness of restrictions targeting the spread of coronavirus
