**Sudden Cardiac Death** Peter Magnusson, Jo Ann LeQuang, 2020-11-19 Sudden cardiac death is a global health threat for which we have only partial answers. With growing elucidation of the underlying pathophysiological mechanisms of sudden cardiac death, better patient identification and treatment options are being developed. These include risk stratification, paradigms, ICD therapy, pharmacological options, ablative procedures, and other treatments. This book covers many of these options, including defibrillator technology and clinical applications. It also examines pathophysiological pathways and etiologies, as well as highlights risk stratification in ion channel diseases and structural heart disease, such as dilated cardiomyopathy.

**Language, Learning, and Disability in the Education of Young Bilingual Children** Dina C. Castro, Alfredo J. Artilles, 2021-04-27 Using an interdisciplinary perspective to discuss the intersection of language development and learning processes, this book summarizes current knowledge and represents the most critical issues regarding early childhood research, policy, and practice related to young bilingual children with disabilities. The book begins with a conceptual framework focusing on the intersection between the fields of early childhood education, bilingual education, and special education. It goes on to review and discuss the role of bilingualism in young children's development and the experiences of young bilingual children with disabilities in early care and education settings, including issues of eligibility and access to care, instruction, and assessment. The book explores family experiences, teacher preparation, accountability, and policy, ending with recommendations for future research which will inform both policies and practices for the education of young bilingual children with disabilities. This timely volume provides valuable guidance for teachers, administrators, policymakers, and researchers.
