Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians Whilst this influence was to become most visible within Hitler's Germany the debates were not by any means restricted to or even originated in Germany Germany was the home of some of the most prominent geographers but this scientific community had a tradition of international debate and exchange with especially British French and Russian geographic societies and institutions Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting raising important questions about the international character and impact of National Socialism Tracing the intellectual history of the international geographic community and its relationship to National Socialism this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work In so doing the book uncovers a long ignored or overlooked important connection between exploration geographers and genocide

**Constructing Nationalities in East Central Europe** Pieter M. Judson, Marsha L. Rozenblit, 2005 The hundred years between the revolutions of 1848 and the population transfers of the mid twentieth century saw the nationalization of culturally complex societies in East Central Europe This fact has variously been explained in terms of modernization state building and nation building theories each of which treats the process of nationalization as something inexorable a necessary component of modernity Although more recently social scientists gesture to the contingencies that may shape these larger developments this structural approach makes scholars far less attentive to the hard work ideological political social undertaken by individuals and groups at every level of society who tried themselves to build national societies The essays in this volume make us aware of how complex multi dimensional and

often contradictory this nationalization process in East Central Europe actually was The authors document attempts and failures by nationalist politicians organizations activists and regimes from 1848 through 1948 to give East Central Europeans a strong sense of national self identification They remind us that only the use of dictatorial powers in the 20th century could actually transform the fantasy of nationalization into a reality albeit a brutal one **BOOK JACKET** The Balkan Wars from Contemporary Perception to Historic Memory Katrin Boeckh, Sabine Rutar, 2017-01-10 This book explores the historical role of the Balkan Wars In Eastern Europe the two Balkan Wars of 1912-13 had greater importance than the First World War for the construction of nations and states This volume shows how these short wars profoundly changed the sociopolitical situation in the Balkans with consequences that are still felt today More than one hundred years later the successors of the belligerent states in Southeastern Europe memorialize the wars as heroic highlights of their respective pasts Furthermore the metaphor that the Balkans were Europe's powder keg perpetuated at the beginning of the twentieth century in the face of these wars was reactivated in both the West and the East up through the Yugoslav wars of the 1990s The authors entangle the hitherto exclusive national master narratives and analyse them cogently and trenchantly for an international readership They make an indispensable contribution to the proper integration of the Balkan Wars into the European historical memory of twentieth century warfare
