

SECTION III. ADJUSTMENTS

This section contains adjustment information for Models 2130 and 2135 tractors. Adjustment information for the 38-inch mower deck is located on page 34 of Section V, Mower Deck.

ADJUSTING THE SEAT

WARNING

Do not adjust the seat when the tractor is moving. Adjusting the seat while the tractor is moving could cause the operator to lose control of the tractor.

Before starting the tractor, adjust the seat forward or rearward to the most comfortable driving position. To reposition the seat, move the seat adjustment lever (Figure 10) upward and slide the seat forward or rearward. Release the adjustment lever when seat is comfortably positioned. Gently rock the seat forward and rearward once to be sure seat is locked in place.

Figure 10

ADJUSTING THE BRAKES

During normal operation of this tractor, the brakes are subject to wear and will need periodic examination and adjustment.

To check brake adjustment, position tractor on a level surface, then place the speed/cruise control lever in the full rearward position. Stop tractor engine and remove ignition key. On Model 2135 only, place the transmission release lever in the TRANSMISSION RELEASED position. Perform the following checks:

1. Engage the brake pedal lock. If the tractor can be pushed forward or rearward, the brake force must be increased.
2. Release the brake pedal lock. If the tractor cannot be pushed forward or rearward, the brake force must be decreased.

Refer to the following instructions to increase or decrease brake force.

To increase the brake force, refer to Figure 11 and proceed as follows:

Figure 11

1. Place the tractor on a level surface with the brake pedal lock disengaged. Stop tractor engine and remove ignition key.
2. While working from the underside of the tractor, remove the hairpin cotter from the brake rod adjustment ferrule. Remove ferrule from brake cam.
3. Turn the ferrule clockwise (inward) one full turn at a time until the ferrule can be inserted in the brake cam as minimum spring tension is applied.
4. Turn the ferrule counterclockwise (outward) one full turn to release the slight spring tension, then install ferrule in brake cam. Insert the hairpin cotter in the hole of the adjustment ferrule.

Recheck the brake adjustment to ensure proper brake operation before operating the tractor. If the tractor can still be pushed with the brake pedal locked (and transmission released on Model 2135 only), see your authorized Cub Cadet dealer.

To decrease the brake force, refer to Figure 11 and proceed as follows:
