One Gospel Nathan N. Hoff,2023-12-18 Is faith in Messiah necessary to the content of saving faith in the Old Testament as it is in the New While the dispensational tradition has been clear that salvation in every age includes a common object God a common basis Christ s death and a common requirement faith it has not always agreed on the content of saving faith across the testaments Written within the dispensational tradition One Gospel seeks to advance the discussion by looking at Paul s use of the Abraham story in Romans 4 This work contends there is continuity between the Old Testament and the New as illustrated by Abraham and Paul The content of saving faith must always include faith in Messiah who in the progress of revelation is identified as Jesus Christ

Writing Bernd Herzogenrath, 2022-11-17 Particularly for the disciplines of the humanities and social sciences for which writing is their lifeblood the crisis in academic writing has become existential It is not hard to diagnose the disease and its causes This book showcases what we desperately need radical alternatives experiments we can try out ways of writing that don't just tweak the system but plot a different course altogether This isn't just about finding new genres for these only change the surface appearance without altering the underlying dynamic Rather the editor and contributors focus on finding new ways to join thinking both with writing and the things of which and with which we write Each chapter brims with the kind of liveliness outspokenness and urgency that their theme demands Far from tiptoeing around the edifice of academia they are intent on stirring things up reigniting their scholarship with a fuse of activism in the hope of setting off an explosion that could send ripples throughout the academy

Listening with Two Ears - New Insights and Perspectives in Binaural Research Huiming Zhang, Yi Zhou, Lina Reiss, 2023-11-27 Hearing is dependent on neural processing of acoustic cues obtained by the left and right ears Neural signals driven by the two ears are integrated at multiple levels of the central auditory system which enables animals including humans to perform various functions including localization of a sound source A natural listening environment typically contains sounds from multiple sources These sounds can have different spectral and temporal features and occur at either the same or different time Integration can happen among neural signals elicited by the same or different sounds The way of integration can greatly affect how individual sounds are sensed and perceived Functions such as auditory grouping and stream segregation which are central to establishing coherent auditory images in a complex listening environment are highly dependent on the way of integration Binaural hearing is complicated by individual differences and developmental changes in head and pinna shape size as binaural cues can be affected by these differences and changes Furthermore neural processing of binaural cues can be influenced by hearing impairments and the use of hearing aids and cochlear implants These factors likely require a listener to optimize the use of binaural cues through learning and to use plastic changes in the nervous system to perform the optimization Great strides have been made in understanding binaural processing in normal and impaired auditory systems This Research Topic aims to highlight some of the latest findings in the following areas 1 Animal behavioral and human psychoacoustical studies of binaural hearing 2 Neural encoding and processing of binaural cues and structural as well as neurophysiological bases of such encoding and processing 3 Contribution of binaural neural processing to auditory functions such as sound source localization binaural fusion binaural interference spatial release from masking auditory grouping and auditory stream segregation 4 Computational models of binaural processing 5 Learning and plastic changes in binaural processing following hearing loss or alterations of acoustic environment and structural as well as physiological bases of these behavioral changes 6 Clinical aspects of binaural processing including application of processing strategies including research on the benefits of bilateral cochlear implantation and the neural correlates thereof

New Perspectives on Judeo-Spanish and the Linguistic

History of the Sephardic Jews ,2024-05-06 At the intersection of Jewish studies and linguistic research the essays assembled in this book approach the topic of the languages of Sephardic Jews from different perspectives spanning chronologically from the Middle Ages to the present day Drawing on diverse sources from medical glossaries to inquisition archives from rabbinic responsa to recordings of today s speakers the scholars collaborating on this project have endeavoured to reconstruct fragments of a complex and elusive linguistic reality which over the centuries has been shaped by the historical experience of its speakers An innovative collection of rigorously conducted synchronic and diachronic studies that contributes to expanding our knowledge and opening new perspectives on crucial issues such as the effects of contact on the linguistic structures the possibility of a norm for polycentric languages the relationship between the lexicon of a language and the vitality of its speech community
