Comprehensively updated this book remains the indispensable student guide to the research process It's not just good it's great Dr Tom Clark Lecturer in Research Methods The University of Sheffield UK The text is informative concise and attractive Each chapter presents sections in an easy to read format with further reading ideas and link ups to the numerous topics covered throughout the book Dr Alaster Scott Douglas Reader in the School of Education University of Roehampton UK Martyn Denscombe is Emeritus Professor at De Montfort University He has a research background in the fields of sociology education and business studies and has published widely on research methods in the social sciences Research Training in the Biomedical, Behavioral, and Clinical Research Sciences National Research Council, Policy and Global Affairs, Board on Higher Education and Workforce, Committee to Study the National Needs for Biomedical, Behavioral, and Clinical Research Personnel, 2011-03-28 Comprehensive research and a highly trained workforce are essential for the

improvement of health and health care both nationally and internationally During the past 40 years the National Research Services Award NRSA Program has played a large role in training the workforce responsible for dramatic advances in the understanding of various diseases and new insights that have led to more effective and targeted therapies In spite of this program the difficulty obtaining jobs after the postdoc period has discouraged many domestic students from pursuing graduate postdoc training In the United States more than 50 percent of the postdoc workforce is made up of individuals who obtained their Ph D s from other countries Indeed one can make a strong argument that the influx of highly trained and creative foreigners has contributed greatly to U S science over the past 70 years Research Training in the Biomedical Behavioral and Clinical Research Sciences discusses a number of important issues including the job prospects for postdocs completing their training questions about the continued supply of international postdocs in an increasingly competitive world the need for equal excellent training for all graduate students who receive NIH funding and the need to increase the diversity of trainees The book recommends improvements in minority recruiting more rigorous and extensive training in the responsible conduct of research and ethics increased emphasis on career development more attention to outcomes and the requirement for incorporating more quantitative thinking in the biomedical curriculum Collaborative Annotation for Reliable Natural Language Processing Karën Fort,2016-06-14 This book presents a unique opportunity for constructing a consistent image of collaborative manual annotation for Natural Language Processing NLP NLP has witnessed two major evolutions in the past 25 years firstly the extraordinary success of machine learning which is now for better or for worse overwhelmingly dominant in the field and secondly the multiplication of evaluation campaigns or shared tasks Both involve manually annotated corpora for the training and evaluation of the systems These corpora have progressively become the hidden pillars of our domain providing food for our hungry machine learning algorithms and reference for evaluation Annotation is now the place where linguistics hides in NLP However manual annotation has largely been ignored for some time and it has taken a while even for annotation guidelines to be recognized as essential Although some efforts have been made lately to address some of the issues presented by manual annotation there has still been little research done on the subject This book aims to provide some useful insights into the subject Manual corpus annotation is now at the heart of NLP and is still largely unexplored There is a need for manual annotation engineering in the sense of a precisely formalized process and this book aims to provide a first step towards a holistic methodology with a global view on annotation

Personnel Literature United States. Office of Personnel Management. Library,1964 **The Behavioral Sciences and Preventive Medicine** John E. Fogarty International Center for Advanced Study in the Health Sciences,1977 **Good Habits, Bad Habits** Wendy Wood,2019-10-01 A landmark book about how we form habits and what we can do with this knowledge to make positive change We spend a shocking 43 percent of our day doing things without thinking about them That means that almost half of our actions aren t conscious choices but the result of our non conscious mind nudging our

body to act along learned behaviors How we respond to the people around us the way we conduct ourselves in a meeting what we buy when and how we exercise eat and drink a truly remarkable number of things we do every day regardless of their complexity operate outside of our awareness We do them automatically We do them by habit And yet whenever we want to change something about ourselves we rely on willpower We keep turning to our conscious selves hoping that our determination and intention will be enough to effect positive change And that is why almost all of us fail But what if you could harness the extraordinary power of your unconscious mind which already determines so much of what you do to truly reach your goals Wendy Wood draws on three decades of original research to explain the fascinating science of how we form habits and offers the key to unlocking our habitual mind in order to make the changes we seek A potent mix of neuroscience case studies and experiments conducted in her lab *Good Habits Bad Habits* is a comprehensive accessible and above all deeply practical book that will change the way you think about almost every aspect of your life By explaining how our brains are wired to respond to rewards receive cues from our surroundings and shut down when faced with too much friction Wood skillfully dissects habit formation demonstrating how we can take advantage of this knowledge to form better habits Her clear and incisive work shows why willpower alone is woefully inadequate when we're working toward building the life we truly want and offers real hope for those who want to make positive change
