## **Nice Practicing Critical Pedagogy Influences Kincheloe:**

*Practicing Critical Pedagogy* Mary Frances Agnello, William Martin Reynolds, 2015-12-22 This edited text recaptures many of Joe L Kincheloe's national and international influences. An advocate and a scholar in the social historical and philosophical foundations of education, he dedicated his professional life to his vision of critical pedagogy. The authors in this volume found mentorship as well as kinship in Joe and express the many ways in which he and his work made profound differences in their work and lives. Joe's research always pushed the limits of what critically reflective and informed teaching entailed, never diluting the import of comprehending the complexity of sociopolitical, cultural, economic, and educational discourses and practices. Dedicated to a praxis of social and political activism rooted in students' development as citizens and workers, the labor of teachers as action researchers, cultural workers, and social mediators is always at the heart of all he achieved. We who were so influenced directly and indirectly by him knew his genius and relished the generosity with which he shared his ideas, advice, encouragement, and art. The world is better because of Joe L Kincheloe's scholarship, inextricably related to critical thinking and enactment of education that tenaciously interrupts complacency, mediocrity, always responding thoughtfully to particular educational contexts. *The SAGE Handbook of Critical Pedagogies* Shirley R. Bringing together scholars from Brazil, Canada, Malta, and the USA, the chapters combine critical pedagogy and social justice education to reorient the conversation around wellness in teaching and learning. Working against white Eurocentric narratives of wellness in schools, which focus on the symptoms, not the causes of society's sickness, the authors argue for a soul revival of education which tackles head-on the causes of dis-ease in society.

from institutional racism colonialism xenophobia and patriarchy The contributors provide fresh perspectives that address short term goals of wellness alongside long term goals of healing in schools and society by attending to underlying causes of social sickness The chapters bridge theory and practice bringing diverse historical and contemporary philosophical discussions around wellness into contact with concrete examples of the interconnections between wellness education and social justice Examples of topics covered include Buddhist practices for healing Black liberation theology hip hop pedagogy anxiety and vulnerability art therapy and story telling

**Learning at the Practice Interface** Neil Hooley,2015-04-24 This book investigates professional practice at the interface of sociology and epistemology for progressive educational change It suggests that orthodox sociology and sociology of education have not sufficiently analysed contemporary educational situations due primarily to the strength of the economic and educational influence of neoliberalism In drawing upon key aspects of the work of Dewey Freire Bernstein and Bourdieu a new reflexive sociology of knowledge is proposed that could potentially revolutionise public schooling and emancipate learning This critical reconceptualisation of curriculum and teaching as well as the democratic inclusion of all children into structures of privileged and community knowledge opens up a new epistemological stage in the sociology of education worldwide In confronting the contradiction between social marginalisation and educational expectations Learning at the Practice Interface explores new approaches to education systems and knowledge production Part A raises questions regarding knowledge pedagogy and social justice that are central to schooling and which support values weakened by neoliberalism These values include democracy equity community collaboration and deference towards knowledge and culture not dependent on wealth and status Part B explores practical issues related to how knowledge is engaged in the school curriculum This discussion goes to the heart of learning at the practice interface and suggests that the lack of epistemological strategies based on sociological description has created serious estrangement from school knowledge for large numbers of students Part C discusses a critical view of knowledge in relation to research teaching and learning and the education profession generally The need for a new reflexive sociology of knowledge is proposed to guide educational dialogue and action such that connections can be made between progressive sociology and epistemology in the interests of all children This book will be of interest to academics and researchers in the Sociology of Education Teacher Education and Education Reform
