Features contributions from the leading most trusted subject matter experts in the field. Evil Corporations Penny Crofts, 2024-07-05. This book elaborates and interrogates the idea of evil corporations from a diverse range of disciplines. There has long been awareness of systemic harms inflicted by corporations but this awareness has rarely led to any effective legal means to prevent and/or respond adequately to them. Lawyers and legal theorists appear to be stuck asking the same questions and giving the same ineffective answers. Part of the problem this book maintains is the relative lack of theoretical interrogation into the nature of corporations as responsible moral agents. To break this stasis, this book draws upon philosophies of wickedness in order to ask whether or not corporations are or can be evil. With contributions from a range of different disciplines including law, cultural theory, theology and philosophy, it offers a novel account of how and why corporate wrongs are caused whilst exploring the extent to which the legal system itself facilitates such wrongdoing. The book targets a broad international audience with research interests in corporate crime. This will be of particular interest to those within the legal discipline including corporate law, criminal law, corporate crime and law and humanities scholars. Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial NoDerivatives (CC BY-NC-ND 4.0) license. *The Routledge Handbook of Technology, Crime and Justice* M. R. McGuire, Thomas Holt, 2017-02-24. Technology has become increasingly important to both the function and our understanding of the justice process. Many forms of criminal behaviour are highly dependent upon technology and crime control has become a predominantly technologically driven process, one where traditional technological aids such as fingerprinting or blood sample analysis are supplemented by a dizzying array of tools and techniques including surveillance devices and DNA profiling. This book offers the first comprehensive and holistic overview of global research on technology, crime and justice. It is divided into five parts, each corresponding with the key stages of the offending and justice process. Part I addresses the current conceptual understanding of technology within academia and the criminal justice system. Part II gives a comprehensive overview of the current relations between technology and criminal behaviour. Part III explores the current technologies within crime control and the ways in which technology underpins contemporary formal and informal social control. Part IV sets out some of the fundamental impacts technology is now having upon the judicial process. Part V reveals the emerging technologies for crime control and justice and considers the extent to which new technology can be effectively regulated. This landmark collection will be essential reading for academics, students and theorists within criminology, sociology, law, engineering and technology and computer science as well as practitioners and professionals.
