Digital Research Confidential Eszter Hargittai, Christian Sandvig, 2015-12-04 Because the digital environment for scholarship is constantly evolving researchers must sometimes improvise change their plans and adapt These details are often left out of research write ups leaving newcomers to the field frustrated when their approaches do not work as expected This resource offers scholars a chance to learn from their fellow researchers mistakes and their successes It presents behind the scenes nuts and bolts stories of digital research projects written by established and rising scholars who discuss such challenges as archiving Web crawling crowdsourcing and confidentiality **Narrating Stance, Morality, and Political Identity** Lauren Zentz, 2021-05-23 This book offers unique insights into the use of Facebook after the 2016 US presidential election interrogating how users in private groups draw on individual experiences in movement building and identity construction while also critically reflecting on ethnographic practices around social media The volume draws on the author's own involvement in a specific Facebook group focused around activism and community organizing in Texas following the 2016 US presidential election Chapters draw on the frameworks of small stories and stance to unpack the ways in which group members use parts of their individual stories to signal beliefs to others present themselves in relation to the group and signal virtues of moral authority on various pressing political issues Building on these analyses Zentz goes on to address ways in which the scales of politics are being navigated and modified at the grassroots level in our highly networked world This book contributes to ongoing conversations about the realities of internet use within linguistic anthropology and new media studies and how researchers might seek to account for social media use and access to this data as these technologies develop further This book is key reading for students and scholars in linguistic anthropology media studies and activism and social movement studies *Personal Relationships and Intimacy in the Age of Social Media* Cristina Miguel, 2018-11-11 This book examines how intimate relationships are built negotiated and maintained through social media The study takes a cross platform approach analysing three social media platforms of different genres Badoo Couchsurfing and Facebook and exploring two interactive forces that shape the way people communicate through social media the platforms architecture and policies and actual practises of use Combining analysis of the political economy of social media with users perspectives of their own practises as well as exploring the tensions between the two the book provides a detailed picture of intimacy as a complex structure of continuity and change **Mobile Messaging and Resourcefulness** Caroline Tagg, Agnieszka Lyons, 2022-03-22 This book advocates a new post digital linguistic ethnography approach to unpacking mobile communication and enabling a more informed understanding of individuals communicative practices in cities today Drawing on data from a group of ordinary working people multilingual individuals from superdiverse cities across the United Kingdom the volume brings observations from this data together to form a new concept of resourcefulness as a means of explaining the emergent sense of agency individuals develop towards remediating existing forms of technology in their everyday lives

The book in turn establishes the notion of the networked individual by way of demonstrating the ways in which communicative practices cross spaces and platforms Further chapters detail examples to highlight resourcefulness at work in enabling more efficient business communication routes to self expression and the creation and development of social support systems while a concluding chapter looks at both the limitations and possibilities of resourcefulness and directions for future research This innovative volume will be of particular interest to students and researchers in applied linguistics sociolinguistics linguistic ethnography and media and communication studies

It's Complicated Danah Boyd,2014-02-25 A youth and technology expert offers original research on teens use of social media the myths frightening adults and how young people form communities What is new about how teenagers communicate through services like Facebook Twitter and Instagram Do social media affect the quality of teens lives In this book youth culture and technology expert Danah Boyd uncovers some of the major myths regarding teens use of social media She explores tropes about identity privacy safety danger and bullying Ultimately Boyd argues that society fails young people when paternalism and protectionism hinder teenagers ability to become informed thoughtful and engaged citizens through their online interactions Yet despite an environment of rampant fear mongering Boyd finds that teens often find ways to engage and to develop a sense of identity Boyd s conclusions are essential reading not only for parents teachers and others who work with teens but also for anyone interested in the impact of emerging technologies on society culture and commerce Offering insights gleaned from more than a decade of original fieldwork interviewing teenagers across the United States Boyd concludes reassuringly that the kids are all right At the same time she acknowledges that coming to terms with life in a networked era is not easy or obvious In a technologically mediated world life is bound to be complicated Boyd s new book is layered and smart It s Complicated will update your mind Alissa Quart New York Times Book Review A fascinating well researched and mostly reassuring look at how today s tech savvy teenagers are using social media People The briefest possible summary The kids are all right but society isn t Andrew Leonard Salon

Applied Media Studies Kirsten Ostherr,2017-12-14 In the age of the maker movement hackathons and do it yourself participatory culture the boundaries between digital media theory and production have dissolved Multidisciplinary humanities labs have sprung up around the globe generating new forms of hands on critical and creative work The scholars artists and scientists behind these projects are inventing new ways of doing media studies teaching and research developing innovative techniques through experimental practice This book of case studies brings together practitioners of applied media studies providing a roadmap for how and why to do hands on media work in the digital age

Imagining Transmedia Ed Finn,Bob Beard,Joey Eschrich,Ruth Wylie,2024-04-23 How the blurring of media forms transmedia became the default for how we experience narratives and how that cultural transformation has redefined the worlds of education entertainment and our increasingly polarized public discourse Over the past decade the power of narrative has been unleashed with awesome and terrifying consequences and it has been consumed in its blurred media

forms by millions of people as news entertainment and education *Imagining Transmedia* edited by Ed Finn Bob Beard Joey Eschrich and Ruth Wylie explores the surprising ways that narratives working across media forms became the default grammar for both media consumption and personal expression and how multiplatform storytelling creates new media literacies and modes of civil discourse Understanding this shift reveals transmedia as an essential building block of media literacy today Transmedia is how we create interpret and participate in our increasingly mediated society It extends beyond popular culture into professional and public spheres while at the same time it fuels the misinformation and polarization that have contributed to America s fraying civic discourse Reaching beyond traditional academic analyses this probing collection of essays and conversations features transmedia practitioners sharing their experiences and inviting readers to imagine the types of multimodal stories and experiences they might create Prioritizing conversation over a single unified theory each section of this volume pairs thematically linked essays from international contributors with a dialogue between authors to create an accessible practical synthesis of ideas

Designing with Data Rochelle King, Elizabeth F Churchill, Caitlin Tan, 2017-03-29 On the surface design practices and data science may not seem like obvious partners But these disciplines actually work toward the same goal helping designers and product managers understand users so they can craft elegant digital experiences While data can enhance design design can bring deeper meaning to data This practical guide shows you how to conduct data driven A B testing for making design decisions on everything from small tweaks to large scale UX concepts Complete with real world examples this book shows you how to make data driven design part of your product design workflow Understand the relationship between data business and design Get a firm grounding in data data types and components of A B testing Use an experimentation framework to define opportunities formulate hypotheses and test different options Create hypotheses that connect to key metrics and business goals Design proposed solutions for hypotheses that are most promising Interpret the results of an A B test and determine your next move

Cybersecurity in Humanities and Social Sciences Hugo Loiseau, Daniel Ventre, Hartmut Aden, 2020-11-17 The humanities and social sciences are interested in the cybersecurity object since its emergence in the security debates at the beginning of the 2000s This scientific production is thus still relatively young but diversified mobilizing at the same time political science international relations sociology law information science security studies surveillance studies strategic studies polemology There is however no actual cybersecurity studies After two decades of scientific production on this subject we thought it essential to take stock of the research methods that could be mobilized imagined and invented by the researchers The research methodology on the subject cybersecurity has paradoxically been the subject of relatively few publications to date This dimension is essential It is the initial phase by which any researcher seasoned or young doctoral student must pass to define his subject of study delimit the contours ask the research questions and choose the methods of treatment It is this methodological dimension that our book proposes to treat The questions the authors were asked to answer were how can cybersecurity be defined What

disciplines in the humanities and social sciences are studying and how cybersecurity What is the place of pluralism or interdisciplinarity How are the research topics chosen the questions defined How concretely to study cybersecurity tools methods theories organization of research research fields data How are discipline specific theories useful for understanding and studying cybersecurity Has cybersecurity had an impact on scientific theories *The New Handbook of Political Sociology* Thomas Janoski, Cedric de Leon, Joya Misra, Isaac William Martin, 2020-03-05 Political sociology is a large and expanding field with many new developments and The New Handbook of Political Sociology supplies the knowledge necessary to keep up with this exciting field Written by a distinguished group of leading scholars in sociology this volume provides a survey of this vibrant and growing field in the new millennium The Handbook presents the field in six parts theories of political sociology the information and knowledge explosion the state and political parties civil society and citizenship the varieties of state policies and globalization and how it affects politics Covering all subareas of the field with both theoretical orientations and empirical studies it directly connects scholars with current research in the field A total reconceptualization of the first edition the new handbook features nine additional chapters and highlights the impact of the media and big data *Routledge Handbook of Urban Public Space* Karen A. Franck, Te-Sheng Huang, 2023-03-20 Is it truly the end of public space This handbook presents evidence that the answer is no In cities in different parts of the world people still use public space to pursue activities of their choice The book is divided into seven sections The first section presents three emerging types of public space Each of the subsequent five sections focuses on a type of activity recreation commerce protest living and celebration These sections are international in scope presenting cases of activities in Brazil China Colombia DR Congo Egypt Finland Germany Libya Taiwan Turkey and the U S The closing section composed of three chapters presents research methods for studying public space Graduate students faculty members and researchers in social science architecture landscape architecture geography and urban design will find the book useful for understanding studying and designing urban public space Storytelling Against Extremism Linda Schlegel, 2025-05-23 Counter and alternative narrative CAN campaigns have become a widely used tool in contemporary efforts to prevent and or counter violent extremism P CVE However one element is conspicuously absent from the discourse There is little engagement with CANs as narratives and neither CAN theory nor practice are based on existing research findings on narrative persuasion processes This is a crucial gap in the current CAN approach Not situating CANs within the broader discourse on narrative persuasion and drawing from the insights narrative persuasion studies offer significantly weakens the theoretical foundation practical development storytelling quality and analysis of CAN campaigns This book addresses this research gap and transfers concepts theories and insights from narrative persuasion and storytelling research to the context of P CVE narrative campaigns The author demonstrates that the often criticized CAN approach can be improved significantly by understanding CANs as narrative persuasion campaigns and grounding them in existing research detailing how to tell entertaining and

persuasive stories **Bit by Bit** Matthew J. Salganik, 2019-08-06 This essential guide to doing social research in this fast evolving digital age explains how the digital revolution is transforming the way social scientists observe behavior ask questions run experiments and engage in mass collaborations

Crisis in the Nordic Nations and Beyond Kristín Loftsdóttir, Lars Jensen, 2016-04-22 With discourses of crisis and disaster featuring strongly in contemporary discourses on contemporary society this book brings together critical perspectives from across the humanities and social sciences to explore the idea of crisis as inherently related to power dynamics and the formation of different subjectivities and identities within the Nordic countries and globally This volume emphasizes the importance of investigating the interrelationship of three crises social economic and environmental as these address the interlinked surfaces of the same reality and it examines the negative connotations of the notion of crisis whilst also raising the question of when and why something becomes identified as crisis and for whom With chapters on media representations of crisis and the global context of crisis discourses the crisis of national identities and their mobilization in response and environmental crisis as well as the interrelationship between the social and the environmental and the different positioning of individuals in relation to power this volume offers an understanding of crisis as a multivocal symbol of the present As such it will appeal to scholars of sociology anthropology history cultural studies literature and political science

Digital Media and Society Simon Lindgren, 2017-05-27 What can flame throwing squirrels tell us about human emotion Can social media empower political activism How has the internet changed the way we form our identities Do algorithms have a social role What is digital society In the early 21st century digital media and the social have become irreversibly intertwined In this cutting edge introduction author Simon Lindgren explores what it means to live in a digital society Neatly divided into three sections Digital Media and Society expertly leads students through Theories from social media and cyber optimism to online social interaction and social change Topics from emotion participation and the public sphere to the impact of data software and mobile technology Tools from digital ethnography social network analysis and text mining to guidance on digital ethics and mixing methods With succinct explanations of key concepts and theories practical exercises to aid understanding and application and suggested further reading sections to guide students through the literature and enhance their own research this is a must have resource for all students of the digital society Digital Media and Society is essential reading for undergraduate and postgraduate courses exploring digital media social media media and society media sociology and the Internet
