## **No Place Distant Roads And Motorized Recreation On Americas Public Lands:**

**America's Public Lands** Randall K. Wilson, 2020-02-25 How it is that the United States the country that cherishes the ideal of private property more than any other in the world has chosen to set aside nearly one third of its land area as public lands Now in a fully revised and updated edition covering the first years of the Trump administration Randall Wilson considers this intriguing question tracing the often forgotten ideas of nature that have shaped the evolution of America's public land system The result is a fresh and probing account of the most pressing policy and management challenges facing national parks forests rangelands and wildlife refuges today The author explores the dramatic story of the origins of the public domain including the century long effort to sell off land and the subsequent emergence of a national conservation ideal Arguing that we cannot fully understand one type of public land without understanding its relation to the rest of the system he provides in depth accounts of the different types of public lands With chapters on national parks national forests wildlife refuges Bureau of Land Management lands and wilderness areas Wilson examines key turning points and major policy debates for each land type including recent Trump Administration efforts to roll back environmental protections He considers debates ranging from national monument designations and bison management to gas and oil drilling wildfire policy the bark beetle epidemic and the future of roadless and wilderness conservation areas His comprehensive overview offers a chance to rethink our relationship with America's public lands including what it says about the way we relate to and value nature in the United States

**No Place Distant** David Havlick, 2002-03-01 While many of the roads on public lands provide a great service with relatively little harm others create significant problems from habitat fragmentation to noise pollution to increased animal mortality with little or no benefit In *No Place Distant* author David Havlick presents for the first time a comprehensive and in depth examination of the more than 550 000 miles of roads that crisscross our national parks national forests Bureau of Land Management lands and wildlife refuges considering how they came to be their ecological financial and societal costs and what can be done to ensure that those roads are as environmentally benign and cost effective as possible while remaining functional and accessible The book places the profusion of roads on our public lands in historical context offers an overview of the ecological effects of roads explores the policies politics and economics that have fostered road building on public lands considers the contentious topic of motorized recreation examines efforts to remove roads and restore degraded lands to health Bringing together an impressive range and depth of information along with a thoughtful analysis of the issues *No Place Distant* offers a definitive look at the debate over roads on public lands With its well crafted prose and extensive documentation it is an unparalleled resource for anyone concerned with the health or management of public lands in the United States

*No Place Distant* David Havlick, 2002-03 Many roads provide a great service with relatively little harm but others offer few or no benefits while creating significant problems from habitat fragmentation to noise pollution to increased animal mortality

*The Governance of Western Public Lands* Martin A. Nie, 2008 Examines the

conflict surrounding public land management revealing how problematic language in public land laws scarcity of resources and mistrust cloud the debates and offering a range of solutions to help move beyond the dysfunctional status quo management

*Protecting Yellowstone* Michael J. Yochim, 2013-04-15 Yellowstone National Park looks like a pristine western landscape populated by its wild inhabitants bison grizzly bears and wolves But the bison do not always range freely snowmobile noise intrudes upon the park's profound winter silence and some tourist villages are located in prime grizzly bear habitat Despite these problems the National Park Service has succeeded in reintroducing wolves allowing wildfires to play their natural role in park forests and prohibiting a gold mine that would be present in other more typical western landscapes Each of these issues bison snowmobiles grizzly bears wolves fires and the New World Mine was the center of a recent policy making controversy involving federal politicians robust debate with interested stakeholders and discussions about the relevant science Yet the outcomes of the controversies varied considerably depending on politics science how well park managers allied themselves with external interests and public thinking about the effects of park proposals on their access and economies Michael Yochim examines the primary influences upon contemporary national park policy making and considers how those influences shaped or constrained the final policy In addition Yochim considers how park managers may best work within the contemporary policy making context to preserve national parks

*Controversial Issues in Adventure Programming* Bruce Martin, Mark Wagstaff, 2012-05-04 *Controversial Issues in Adventure Programming* offers an engaging approach to the consideration of enduring current and emerging issues in the field Written primarily for upper level undergraduate and graduate students the text presents 20 issues in a debate format challenging students to participate in critical discourse concerning these issues as practitioners in the field of adventure programming Respected authors Bruce Martin and Mark Wagstaff have assembled a team of more than 50 contributors from around the globe to reassess some of the underlying assumptions on which adventure programming is based They have critically examined implications of new developments for emerging practice and discussed how best to position the field of adventure programming in addressing broader societal concerns To set the stage for the debate each issue is prefaced with a general overview including the evolution of the issue and its significance in light of broader social concerns Then contributors present the pros and cons of each issue A debate format helps students develop an understanding of the key points around each issue while also becoming familiar with current research pertinent to these issues This approach also encourages students to grapple with these issues and begin to develop their own informed thoughtful perspectives as they prepare for careers in adventure programming *Controversial Issues in Adventure Programming* is divided into two parts Part I begins by discussing issues of ongoing concern in the field including the certification debate motorized versus nonmotorized forms of outdoor recreation and program accreditation In part II contemporary and emerging issues are presented such as the use of online educational programming in the field of adventure programming As a reference for practitioners and policy makers *Controversial Issues*

in Adventure Programming offers new and updated perspectives on enduring and emerging issues as well as a synthesis of the most recent related scholarly literature In addition the text serves as a resource in understanding how the adventure programming industry can contribute to addressing issues of broad concern in society such as public health global climate change stewardship of public lands and waterways and education reform Controversial Issues in Adventure Programming encourages readers to participate in some of the central debates occurring in the field In particular this timely resource will help students broaden their understanding of the field as they critically examine and respond to a range of enduring contemporary and emerging topics in adventure programming

**Tahoe National Forest (N.F.), Motorized Travel Management**, 2010 Resources Under Regimes Paul R. Josephson, 2004 Josephson investigates the extent to which the form of government in any state determines how politicians bureaucrats scientists engineers and industrialists address environmental and social problems presented by the transformation of nature into a humanized landscape

**A Road Runs Through it** Thomas Reed Petersen, 2006 This book explores what many consider to be the most important issue in the re wilding of America today roads Not highways but the 500 000 miles of roads built on federal forest lands to access natural resources and then abandoned when the resources were removed A Road Runs Through It features a collection of essays by some of today s finest nonfiction writers Peter Matthiessen Barry Lopez Janisse Ray David Quammen David Petersen Stephanie Mills William Kittredge and two dozen others Together they cover all aspects of roads and their impact on the wilderness As all royalties from this book are being donated to Wildlands CPR a nonprofit organization dedicated to protecting and reviving wild places by promoting road removal and re vegetation this book not only educates and informs on the issues of roads it becomes part of the solution Book jacket

**British Columbia's Inland Rainforest** Susan Stevenson, 2011-07 The vast temperate rainforests of coastal British Columbia are world renowned but much less is known about the other rainforest located 500 kilometres inland along the western slopes of the interior mountains The unique integration of continentality and humidity in this region favours the development of lush rainforest communities that incorporate both coastal and boreal elements In British Columbia s Inland Rainforest scientists bring together for the first time a broad spectrum of information about this distinctive ecosystem They also consider the ecological consequences of human activities in the rainforest and present strategies for its management and conservation

**Population Change and Rural Society** William A. Kandel, David L. Brown, 2006-02-08 This book contains the latest research on social and economic trends occurring in rural America It provides a unique focus on rural demography and the interaction between population dynamics and local social and economic change It is also the first volume on rural population that exploits data from Census 2000 The book highlights major themes transforming contemporary rural areas and each is examined with an expanded overview and case study

*The Ecology of Transportation: Managing Mobility for the Environment* John Davenport, Julia L. Davenport, 2006-06-30 Human transport by land sea and air has increased exponentially through time in intensity paralleling

risers in population prosperity and rates of technological change Transport has considerable ecological effects many of them detrimental to environmental sustainability This volume brings together international experts from a variety of disciplines to review the ecological effects and their causes in terms of road rail ship and aircraft transport The contributors have different attitudes and agendas Some are ecologists some planners others social scientists Focus ranges from identification of threats and amelioration of damaging effects through to future design of transport systems to minimize environmental degradation Some chapters consider restricted areas of the globe others the globe itself Views encompass deep pessimism and cautious optimism

**Roads and Ecological Infrastructure** Kimberly M. Andrews, Priya Nanjappa, Seth P. D. Riley, 2015-06  
Published in association with The Wildlife Society Old World and New World Perspectives in Environmental Philosophy Martin Drenthen, Jozef Keulartz, 2014-07-28 This is the first collection of essays in which European and American philosophers explicitly think out their respective contributions and identities as environmental thinkers in the analytic and continental traditions The American European as well as Analytic Continental collaboration here bears fruit helpful for further theorizing and research The essays group around three well defined areas of questioning all focusing on the amelioration management of environmentally historically and traditionally diminished landscapes The first part deals with differences between New World and the Old World perspectives on nature and landscape restoration in general the second focuses on the meaning of ecological restoration of cultural landscapes and the third on the meaning of the wolf and of wildness It does so in a way that the strengths of each philosophical school continental and analytic comes to the fore in order to supplement the other s approach This text is open to educated readers across all disciplines particularly those interested in restoration adaptation ecology the cultural construction of place and landscape the ongoing conversation about wilderness the challenges posed to global environmental change The text may also be a gold mine for doctoral students looking for dissertation projects in environmental philosophy that are inclusive of continental and analytic traditions This text is rich in innovative approaches to the questions they raise that are reasonably well thought out The fact that the essays in each section really do resonate with one another directly is also intellectually exciting and very helpful in working out the full dimensions of each question raised in the volume

Our Common Ground John D. Leshy, 2022-02-08 The little known story of how the U S government came to hold nearly one third of the nation s land and manage it primarily for recreation education and conservation A much needed chronicle of how the American people decided wisely and democratically that nearly a third of the nation s land surface should remain in our collective ownership and be managed for our common good Dayton Duncan author of The National Parks America s Best Idea America s public lands include more than 600 million acres of forests plains mountains wetlands deserts and shorelines In this book John Leshy a leading expert in public lands policy discusses the key political decisions that led to this beginning at the very founding of the nation He traces the emergence of a bipartisan political consensus in favor of the national government holding these vast land areas primarily for recreation

education and conservation of biodiversity and cultural resources That consensus remains strong and continues to shape American identity Such a success story of the political system is a bright spot in an era of cynicism about government This book is essential reading for anyone who cares about public lands and it is particularly timely as the world grapples with the challenges of climate change and biodiversity loss *American Environmental Policy, updated and expanded edition* Christopher Mcgrory Klyza, David J. Sousa, 2013-08-30 An updated investigation of alternate pathways for American environmental policymaking made necessary by legislative gridlock The golden era of American environmental lawmaking in the 1960s and 1970s saw twenty two pieces of major environmental legislation including the Clean Air Act the Clean Water Act and the Endangered Species Act passed by bipartisan majorities in Congress and signed into law by presidents of both parties But since then partisanship the dramatic movement of Republicans to the right and political brinksmanship have led to legislative gridlock on environmental issues In this book Christopher Klyza and David Sousa argue that the longstanding legislative stalemate at the national level has forced environmental policymaking onto other pathways Klyza and Sousa identify and analyze five alternative policy paths which they illustrate with case studies from 1990 to the present appropriations politics in Congress executive authority the role of the courts next generation collaborative experiments and policymaking at the state and local levels This updated edition features a new chapter discussing environmental policy developments from 2006 to 2012 including intensifying partisanship on the environment the failure of Congress to pass climate legislation the ramifications of Massachusetts v EPA and other Obama administration executive actions some of which have reversed Bush administration executive actions Yet they argue despite legislative gridlock the legacy of 1960s and 1970s policies has created an enduring green state rooted in statutes bureaucratic routines and public expectations

**The World Beyond the Windshield** Christof Mauch, Thomas Zeller, 2008 For better or worse the view through a car's windshield has redefined how we see the world around us In some cases such as the American parkway the view from the road was the be all and end all of the highway in others such as the Italian autostrada the view of a fast efficient transportation machine celebrating either Fascism or its absence was the goal These varied environments are neither necessary nor accidental but the outcomes of historical negotiations and whether we abhor them or take delight in them they have become part of the fabric of human existence *The World beyond the Windshield Roads and Landscapes in the United States and Europe* is the first systematic comparative look at these landscapes By looking at examples from the United States and Europe the chapters in this volume explore the relationship between the road and the landscape that it traverses cuts through defines despoils and enhances The authors analyze the Washington Beltway and the Blue Ridge Parkway as well as iconic roads in Italy Nazi Germany East Germany and Great Britain This is a story of the transatlantic exchange of ideas about environment and technology and of the national and nationalistic appropriations of such landscaping **Forest Land Conversion, Ecosystem Services, and Economic Issues for Policy** Robert A. Smail, 2010-10 The continued conversion

and development of forest land pose a serious threat to the ecosystem services derived from forested landscapes There are unavoidable challenges involved in quantifying the threats from forest conversion and their related costs to human well being 1 most attempts to quantify the costs of forest conversion on ecosystem services will necessarily rely on specific ecological science that is often emerging changing or simply nonexistent 2 given the interconnected nature of ecosystem products and processes any attempt to quantify the effects of forest conversion must grapple with jointness in production 3 the ecology and the human dimensions of ecosystems are highly specific to spatial temporal circumstances **Observation Points**
