Congressional Record United States. Congress, 1965 *Brave New Home* Diana Lind, 2020-10-13 This smart provocative look at how the American Dream of single family homes, white picket fences, and two-car garages became a lonely, overpriced nightmare explores how new trends in housing can help us live better. Over the past century, American demographics and social norms have shifted dramatically. More people are living alone, marrying later in life, and having smaller families. At the same time, their lifestyles are changing, whether by choice or by force, to become more virtual, more mobile, and less stable. But despite the ways that today's America is different and more diverse, housing still looks stuck in the 1950s. In *Brave New Home*, Diana Lind shows why a country full of single family houses is bad for us and our planet, and details the new efforts underway that better reflect the way we live now to ensure that the way we live next is both less lonely and more affordable. Lind takes readers into the homes and communities that are seeking alternatives to the American norm: from multi-generational living in law suites and co-living to microapartments, tiny houses, and new rural communities. Drawing on Lind's expertise and the stories of Americans caught in or forging their own paths outside of our cookie-cutter housing trap, *Brave New Home* offers a diagnosis of the current American housing crisis and a radical re-imagining of future possibilities *Doing Digital Film History* Sarah-Mai Dang, Tim van der Heijden, Christian Gosvig Olesen, 2024-12-30 How has the digital turn shaped the practices of film historical research and teaching? While computational approaches have been used by film historians since the 1960s and 1970s, the arrival and use of digital tools and methods in recent decades has fundamentally changed the ways we search, analyze, interpret, present, and so think and write about film history, from digital archival and curatorial practices, data-driven search and analysis of film historical collections, to the visualization and dissemination of film historical materials.

online While film historians have increasingly embraced the new possibilities brought by digital technologies their practical epistemological and methodological implications need further exploration What opportunities does the digitization of film historical sources provide for film historians What new questions can be raised by using digital methods What new perspectives emerge from analyzing interpreting and visualizing film historical data at the levels of both close and distant or scalable reading and viewing By focusing on the concepts tools and practices of digital film historiography this edited volume aims to contribute to a better understanding and critical reflection on the changes and continuities of doing film history in the digital age
