**Mother / Nature** Catherine M. Roach, 2003-01-30 This brief but ambitious book explores our

relationship with nature through the imagery we use when we talk about Mother Nature Employing the critical tools of religious studies psychology and gender studies Catherine M Roach examines the various manifestations of nature as mother and what that idea implies for the way we approach the natural world Part One Nature as Good Mother discusses the notion that nature is or is like a beneficent and nurturing mother who provides and maintains life In studying the green slogan Love Your Mother Roach questions the effects for women and for the environment of imputing female gender to nature She asks us to look at the associations that motherhood and mothering carry within a culture still shaped by patriarchy She notes the danger of such an apparently pro environmental slogan if mother evokes the bountiful self sacrificing provider who herself requires no care Part Two Nature as Bad Mother looks at the contrary notion of nature as a violent threatening and wrathful mother This image arises most often when humans and technology are depicted as masters of unruly nature Here Roach draws on theological reflection to analyze this ambivalence toward nature manifested in a fantasy that casts humans as gods She explores the contributions of eco theology and eco psychology to a heart of darkness perspective Finally Part Three Nature as Hurt Mother looks at possibilities and pitfalls of environmental healing inherent in the image of nature as a mother we have wounded and now seek to heal

*Reconstructing a Christian Theology of Nature* Revd Dr Anna Case-Winters, 2013-05-28 In the present ecological crisis it is imperative that human beings reconsider their place within nature and find new more responsible and sustainable ways of living Assumptions about the nature of God the world and the human being shape our thinking and consequently our acting Some have charged that the Christian tradition has been more a hindrance than a help because its theology of nature has unwittingly legitimated the exploitation of nature This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Anna Case Winters argues that Christian tradition has a more viable theology of nature to offer She takes a look at some particulars in Christian tradition as a way to illustrate the undeniable problems and to uncover the untapped possibilities In the process she engages conversation partners that have been sharply critical and particularly insightful feminist theology process thought and the religion and science dialogue The criticisms and insights of these partners help to shape a proposal for a reconstructed theology of nature that can more effectively fund our struggle for the fate of the earth

**The Bible in Theology and Preaching** Donald K. McKim, 1999-05-05

*Voices and Echoes* Jo-Anne Elder, Colin O'Connell, 2010-10-30 Every time we raise our voices we hear echoes Jo Anne Elder from the Foreword Through short stories journal entries and poetry the women in *Voices and Echoes* explore the changing landscape of their spiritual lives Experienced writers such as Lorna

Crozier Di Brandt and Ann Copeland as well as strong new voices appear to speak to each other as they draw from a wealth of personal resources to find a way to face life's questions and discover meaning in their lives. There is something familiar about these stories and poems; they echo those we've heard before and those we've half forgotten. Whether they search for a voice in a world where men monopolize or journey into painful memories to free the self from the past, they do not despair; they do not end. Individual entries become the whole story, an unending story of rebirth and reaffirmation. The book begins with an illuminating foreword that introduces readers to the cultural and philosophical background of many of the stories and concludes with the reflections of scholars, writers, and artists that are intended to provoke further discussion. **My Quests**

**for Hope and Meaning** Rosemary Radford Ruether, 2013-10-02 This book is an autobiography tracing Rosemary Radford Ruether's intellectual development and writing career. Ruether examines the influence of her mother and family on her development and particularly her interactions with the Roman Catholic religious tradition. She delves into her exploration of interfaith relations with Judaism and Islam as well. Her educational formation at Scripps College and the importance of historical theology is also a major emphasis. Mental illness has also affected Ruether's nuclear family in the person of her son, and she details the family's struggle with this issue. Finally, in this intellectual autobiography, Ruether explores her long concern and involvement with ecology, feminism, and the quest for a spirituality and practice for a livable planet. American

Theology, Superhero Comics, and Cinema Anthony Mills, 2013-10-01 Stan Lee, who was the head writer of Marvel Comics in the early 1960s, co-created such popular heroes as Spider-Man, Hulk, the X-Men, the Fantastic Four, Iron Man, Thor, and Daredevil. This book traces the ways in which American theologians and comic books of the era were not only both saying things about what it means to be human but, starting with Lee, they were largely saying the same things. Author Anthony R. Mills argues that the shift away from individualistic ideas of human personhood and toward relational conceptions occurring within both American theology and American superhero comics and films does not occur simply on the ontological level but is also inherent to epistemology and ethics, reflecting the comprehensive nature of human life in terms of being, knowing, and acting. This book explores the idea of the American monomyth that pervades American hero stories and examines its philosophical and theological origins and specific manifestations in early American superhero comics. Surveying the anthropologies of six American theologians who argue against many of the monomyth's assumptions, principally the staunch individualism taken to be the model of humanity, and who offer relationality as a more realistic and ethical alternative, this book offers a detailed argument for the intimate historical relationship between the now disparate fields of comic book, superhero film, creation, on the one hand, and Christian theology, on the other, in the United States. An understanding of the early connections between theology and American conceptions of heroism helps to further make sense of their contemporary parallels, wherein superhero stories and theology are not strictly separate phenomena but have shared origins and concerns.

**Knowledge That Matters** Lucy Tatman, 2001-12-13 Lucy Tatman identifies the events and ideas that influenced the

formation of a North american feminist paradigm She explores the components of this paradigm particularly the way in which they affect the understanding of knowledge She then examines the representation of these elements in the theologies of three prominent feminist theologians in North America Rosemary Radford Ruether Carter Heyward and Sallie McFague From her discussion of these scholars she proposes that a responsible feminist practice of epistemology requires participatory discernment
