They don't teach you how to get rich at school Sick of Hearing the Same Old Advice Word Hard Control your expenses Credit Card is a No NO Do not get into Debt Debunk all those assumptions that you will be Rich if you study hard and work hard This Book is actually not one of those Wealth Tips They Do Not Teach at School is all about the importance of money The premise of the book clearly distinguishes the difference between the thinking of the rich and the poor In essence the only limitation between you and the rich is in your own mind and achieving success lies in breaking these walls At schools you would have been stuck at algebra Pythagorean Theorem and organic chemistry but you never study financial planning making money or saving money The book provides real life examples to reprogram your thinking to that of the rich and wealthy You can't just graduate and leave formal education and expect yourself to be financially well equipped Many people thought that having a good education is sufficient to hop on the train to acquire new wealth well they can't be any more wrong As a kid I have been told that getting good grades and a good job is the ladder to financial freedom It's a sham Everything boils down to your financial decisions and this book provides a great foundation to teach you those This book is comprehensive crisp and easy to read And by easy I mean this book provides sound information on the importance of money It clearly distinguishes the difference between the thinking of the rich and the poor The biggest revelation for me was that the author is right They never taught me how to be rich at school It is having the mindset of the wealthy that will make you rich You'll discover why some of your money beliefs might be wrong and that could be holding you back you need to consider what are the principles and what behaviors the rich have that you do not have Yet Laura Maya takes this idea and updated it to Sixteen chapters You wouldn't find a recipe to turn rich overnight Rather the book provides a solid foundation for setting the psychological stage for strong financial habits The premise of this book is straightforward Rich people are programmed to think differently Essentially rich people and poor people think differently This book walks you through these beneficial points clearly differentiating how rich and poor people think Studying hard getting nice grades and getting a job is not enough to be rich That's one lie which we have been fed with since our childhood There is a difference between scholastic professional and financial education The book further analyzes the root cause of why you are not rich It all boils down to your education You were never taught about how to be rich at school Forget that you never even learned personal finance or how to handle money It further touches upon how you can get smart with personal finance Perhaps the biggest argument Laura makes is the fact that everything can change if you change your mindset Buying that expensive dress impulsive buying etc are all signs of a poor mentality If you make changes to your lifestyle and spending habits today you will reap the benefits tomorrow On making money Laura's approach is simple she emphasizes on investing spend less and plan for a long term
