The Green Book of Language Revitalization in Practice Leanne Hinton, Kenneth Hale, 2013-06-13

With world wide environmental destruction and globalization of economy a few languages especially English are spreading rapidly in use while thousands of other languages are disappearing taking with them important cultural philosophical and environmental knowledge systems and oral literatures. We all stand to suffer from such a loss none more so than the communities whose very identity is being threatened by the impending death of their languages. In response to this crisis indigenous communities around the world have begun to develop a myriad of projects to keep their languages alive. This volume is a set of detailed accounts about the kind of work that is going on now as people struggle for their linguistic survival. It also serves as a manual of effective practices in language revitalization. Following are the key features: 23 case studies of language revitalization in practice from Native American languages Australian languages Maori Hawaiian Welsh Irish and others written primarily by authors directly involved in the programs; short introductions situate the languages to help make the languages more real in the minds of readers; each chapter gives a detailed overview of the various kinds of programs and methods in practice today; introductions and maps for each of the languages represented familiarize the reader with their history linguistic structure and sociolinguistic features; and strong representation in authorship and viewpoint of the people and communities whose languages are threatened gives the readers an inside understanding of the issues involved and the community internal.

serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries, cultures of East, Southeast, and South Asia, with a wealth of resources for understanding, interacting with, and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers nationwide, cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries: public, school, and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public, school, and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described. Literacy levels, reading cultures, languages, and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.
