Muireann McNulty

**Handbook of Thanatology** David K. Meagher, David E. Balk, 2013-07-18 If ever there was an area requiring that the research-practice gap be bridged surely it occurs where thanatologists engage with people dealing with human mortality and loss. The field of thanatology, the study of death and dying, is a complex multidisciplinary area that encompasses the range of human experiences, emotions, expectations, and realities. The *Handbook of Thanatology* is the most authoritative volume in the field, providing a single source of up-to-date scholarship, research, and practice implications. The handbook is the recommended resource for preparation for the prestigious certificate in thanatology (CT) and fellow in thanatology (FT) credentials which are administered and granted by ADEC.

*Social Workers' Desk Reference* Albert R. Roberts, 2009 This is a new edition of the wildly successful everyday reference for social workers. Like the first edition, it has been crafted with the help of an extensive needs assessment survey of educators and front-line practitioners ensuring that it speaks directly to the daily realities of the profession. It features 40% new material and a more explicit focus on evidence-based practice.

**Handbook of Infant, Toddler, and Preschool Mental Health Assessment** Rebecca DelCarmen-Wiggins, Alice Carter, 2004-03-25 The *Handbook of Infant, Toddler, and Preschool Mental Health Assessment* brings together for the first time leading clinical researchers to provide empirically based recommendations for assessment of social, emotional, and behavior problems and disorders in the earliest years. Each author presents state-of-the-art information on scientifically valid developmentally based clinical assessments and makes recommendations based on the integration of developmental theory, empirical findings, and clinical experience. Though the field of mental health assessment in infants and young children lags behind work with older children and adults, recent scientific advances, including new measures and diagnostic approaches, have led to dramatic growth in the field. The editors of this exciting new work have assembled an extraordinary collection of chapters that thoroughly discuss the conceptualizations of dysfunction in infants and young children, current and new diagnostic criteria, and such specific disorders as sensory modulation dysfunction, sleep disorders, eating and feeding disorders, autistic spectrum disorders, anxiety disorders, posttraumatic stress disorder, and ADHD. Chapters further highlight the importance of incorporating contextual factors such as parent-child relationship functioning and cultural background into the assessment process to increase the validity of findings. Given the comprehensiveness of this groundbreaking volume in reviewing conceptual, methodological, and research

advances on early identification diagnosis and clinical assessment of disorders in this young age group it will be an ideal resource for teachers researchers and a wide variety clinicians including child psychologists child psychiatrists early intervention providers early special educators social workers family physicians and pediatricians
