cube so that it contains the digits 1 to 9 but to also fill in the outlined cubes so they add up to the same number Hints to solve the puzzle are hidden in the joined squares where only one combination of numbers applies In the case of joined squares if the printed number is 3 it should be 1 and 2 that go into the squares Likewise in the case of three joined squares if the printed number is 6 the only combination possible is 1 2 and 3 To add one final fiendish level each puzzle also has a time worked out by its Japanese creators so you can try to beat the clock
