Frey,2013-09-13 Modern Classroom Assessment offers an applied student centered guide to the major research based approaches to assessment in today s modern classroom Rather than simply list basic assessment formats with a few examples as many textbooks do award winning professor and scholar Bruce Frey s book fully explores all five key approaches for teacher designed assessment Traditional Paper and Pencil Performance Based Assessment Formative Assessment Universal Test Design and Authentic Assessment while making abstract concepts and guidelines clear with hundreds of real world illustrations and examples of what actual teachers do Offering a variety of engaging learning tools and realistic stories from the classroom this text will give any reader a strong foundation for designing modern assessments in their own classrooms Charting Reform, Achieving Equity in a Diverse Nation Gail L. Sunderman,2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the

implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens
