BUILDING A STRONG COMMUNITY

Written by Jeremy H. Gerald

A newsletter is an easy and effective way to grow interest in your church. Use it to address regular parishioners or newcomers and inform them about upcoming events. The front page usually contains a list of the feature articles enclosed within. Remember to choose topics catered to your chosen audience. Highlight fun moments from past events, share thoughts on a powerful piece of scripture, or announce activities and charity work. Pair them with your best photos. You can also add your address and other contact details. Finally, double-check facts to make sure everything you publish is accurate.

Macs in the Ministry David Lang, 2010-02-21 Macs in the Ministry Your ministry demands your time energy creativity passion and commitment But you ve got a Mac so you have a tool that can save you time and energy spark your creativity and enable you to keep your commitments without losing your passion Find out how to harness the programs you already have along with additional resources you may want to consider to help you in nearly every aspect of your ministry Part One of this book is about Inspiration about discovering what s possible Learn how to use online resources or Bible software to prepare a lesson or sermon Discover the variety of ways you can present your message to a congregation or audience using video created in iMovie photo slide shows prepared in iPhoto original music recorded in GarageBand and more elaborate presentations using Keynote or specialized worship software Learn how you can publish your message to a wider audience through flyers handouts and other print publications by creating podcasts and vodcasts video podcasts and distributing them through iTunes by creating your own professional quality CDs and DVDs by making your videos available through websites like YouTube or by developing your own great looking websites using iWeb

and Apple's MobileMe service. Once you're pumped about all the exciting ways you can present and publish your message, you'll probably need to enlist some help from others. Use the Mac to get members of your congregation or church youth group participating in your ministry. With so many different ways to use Macs in ministry, there are countless opportunities to get people using their gifts in service to the kingdom. Going one step further, you'll even see how the Mac can be used to meet practical needs. Forget car washes to raise money for youth retreats and mission trips. Why not develop and sell personalized greeting cards, calendars, audio CDs or video DVDs? How about starting a ministry to train people in the community to do basic video editing, page layout or web design? With a little creativity, you can use your Mac to minister to people's practical needs as well as to present a polished message.

Part Two of this book is about perspiration about actually making these things happen. Here you'll find a series of projects that will show you how to do all the things you're now inspired to do. Get step-by-step instructions for creating an iMovie, developing slide shows and print projects in iPhoto, recording and publishing podcasts, producing a DVD and developing a web site in iWeb. See what you can do using other applications like Pages, Keynote, Bible study software and worship presentation software. Where Part One will get your wheels turning, Part Two will actually get you moving.

Ready, Set, Lead! Lynda C. Ward, Steven Phillip Brey, 2006. Packed with practical tips, reproducible pages, checklists and suggested resources, this ready-to-use resource helps first-time pastors or those new to an established church get started the first day and the first Sunday.

Professional Microsoft Search Thomas Rizzo, Richard Riley, Shane Young, 2008-08-20. Written by three of the most recognized influencers in the Microsoft SharePoint community, this book sheds light on SharePoint Search in the enterprise and focuses solely on Microsoft Search technology. This book is intended for a range of folks from the IT administrator to the developer writing search applications. We span many topics in this book to try to cover the breadth of using, administering and developing on the SharePoint Search technologies. The developer chapters will be important for the administrator to understand since developers and administrators have to work together to make Search work. On the flip side, the administrator chapters will be important for developers to understand the architecture and administration of Search because without this knowledge, writing to the APIs will be more difficult. Most readers will benefit from reading all the chapters in this book. This book covers the breadth of the SharePoint Search technologies from Search Server to Windows SharePoint Services to Office SharePoint Server. We also include information on the latest search technologies coming from Microsoft, including the new federation capabilities, filter pack and the recently acquired FAST technologies. This book is structured in such a way that you can read it from end to end. The chapters are laid out in such a way that they build on each other, starting with an overview chapter and ending with an API chapter that shows you how to program against all the technology about which you just learned. If you are

new to SharePoint the first few chapters will be important for you to understand and digest before moving on since the array of search technologies can be overwhelming for someone new to them For experienced SharePoint readers the overview chapters are a good refresher to skim through but you probably can skip right to the detailed chapters starting with Chapter 3 Planning and Deploying an Enterprise Search Solution The topics covered include Introduction to Enterprise Search Overview of Microsoft Enterprise Search Products Planning and Deploying an Enterprise Search Solution Configuring and Administering Search Searching LOB Systems with the BDC User Profiles and People Search Extending Search with Federation Securing Your Search Results Customizing the Search Experience Understanding and Tuning Relevance Building Applications with the Search API and Web Services To get the most from this book you will want a copy of Office SharePoint Server Windows SharePoint Services or Search Server will work but you will not have access to all the search capabilities we talk about in the book One easy way to get an evaluation copy of SharePoint is to download the SharePoint virtual machine from MSDN You can find a link to the virtual machine on the SharePoint home page at www.microsoft.com/office/sharepoint This virtual machine while large is preconfigured for you so that you can start working with the SharePoint Search technologies without having to install all the software and configure it
