(Docket No. NHTSA-2010-0002)

Visual Manual NHTSA Driver Distraction Guidelines for In-Vehicle Electronic Devices

Agency: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).
ACTION: Notice of proposed Federal guidelines.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) is concerned about the effects of distractions due to drivers' use of electronic devices on motor vehicle safety. Consequently, NHTSA is issuing nonbinding, voluntary NHTSA Driver Distraction Guidelines (NHTSA Guidelines) to promote safety by discouraging the introduction of secondary distracting devices to vehicles.

This notice details the contents of the first phase of the NHTSA Driver Distraction Guidelines. These NHTSA Guidelines cover original equipment in-vehicle device secondary tasks: communications, entertainment, information gathering, and navigation tasks not required to drive are considered secondary tasks performed by the driver through visual-manual means decreasing the driver's looking at a device, manipulating a device-related control with the driver's hand, and watching for visual feedback.

The proposed NHTSA Guidelines that exclude secondary, non-driving related tasks that, based on NHTSA's research, are hindered by the agency's interest inherently with a driver's ability to safely control the vehicle. The Guidelines recommend that those in-vehicle devices be designed so that they cannot be used by the driver to perform such tasks while the device is driving. For all other secondary, non-driving related visual-manual tasks, the NHTSA Guidelines specify a test method for measuring the impact of task performance on driving task while driving, and time-based acceptance criteria for assessing whether a task interferes too much with driver attention to be suitable to perform while driving. If a task does not meet the acceptance criteria, the NHTSA Guidelines recommend that in-vehicle devices be designed so that the task cannot be performed by the driver while driving. In addition to identifying inherently distracting tasks and providing a means for measuring and

evaluating the level of distraction associated with other non-driving-related tasks, the NHTSA Guidelines contain several design recommendations for in-vehicle devices in order to minimize their potential for distraction.

NHTSA seeks comments on these NHTSA Guidelines and any suggestions for how to improve them so as to better enhance motor vehicle safety.
