The Other 1980s Brannon Costello, Brian Cremins, 2021-06-02 Fans and scholars have long regarded the 1980s as a significant turning point in the history of comics in the United States but most critical discussions of the period still focus on books from prominent creators such as Frank Miller Alan Moore and Art Spiegelman eclipsing the work of others who also played a key role in shaping comics as we know them today *The Other 1980s* offers a more complicated and multivalent picture of this robust era of ambitious comics publishing The twenty essays in *The Other 1980s* illuminate many works hailed as innovative in their day that have nonetheless fallen from critical view partly because they challenge the contours of conventional comics studies scholarship open ended serials that eschew the graphic novel format beloved by literature departments sprawling superhero narratives with no connection to corporate universes offbeat and abandoned experiments by major publishers including Marvel and DC idiosyncratic and experimental independent comics unusual genre exercises filtered through deeply personal sensibilities and oft neglected offshoots of the classic underground comics movement of the 1960s and 1970s The collection also offers original examinations of the ways in which the fans and critics of the day engaged with creators and publishers establishing the groundwork for much of the contemporary critical and academic discourse on comics By uncovering creators and works long ignored by scholars *The Other 1980s* revises standard histories of this major period and offers a more nuanced understanding of the context from which the iconic comics of the 1980s emerged

Conversations with Rick Veitch Brannon Costello, 2025-06-18 From his roots in underground comics to his high profile runs on mainstream characters Rick Veitch b 1951 has carved out a career unlike anyone else's Collecting thirteen interviews including three published here for the first time *Conversations with Rick Veitch* offers a wealth of insight not only into the development of

Veitch's graphic innovations and metaphysical explorations but also into the upheavals and transformations of American comics from the 1970s to today. In acclaimed comics such as *The Maximortal*, *Army Love*, and *Can't Get No*, Veitch employs a style that synthesizes Jack Kirby at his most cosmic, the mind-bending graphic sensibility of European innovators such as Jean Moebius, Giraud, and Philippe Druillet, and the brass-tacks realism of classic war cartoonists such as John Severin and Russ Heath. His comics defamiliarize popular genres, especially superheroes, war stories, and science fiction, with his philosophical musings and pointedly satirical political perspective. Yet Veitch's capacious mind reaches beyond these familiar genres too, as his long-running autobiographical dream comic *Roarin' Rick's Rare Bit Fiends* attests. Ranging across topics such as his early days at the Joe Kubert School, the controversial end of his *Swamp Thing* run, his muckraking work as a comics journalist, and his educational comics publishing venture *Eureka Comics*, the interviews collected here reveal Veitch to be both a shrewd observer of the pitfalls of the marketplace and an eloquent spokesman for the boundless potential of creativity. A comics maker since childhood and a fierce advocate of creator's rights and the possibilities of self-publishing, Veitch knows all too well the many persistent obstacles to creating comics that challenge readers instead of condescending to them. Yet Veitch remains optimistic about the potential of comics. According to Veitch, comics might be the form of the future. If that's the case, then his work is a map to that future.

Barrell, 2013-11-18 *Dead Stars* is a science fiction horror role-playing game powered by the alternate d20 *Universal Decay* rules system. This book contains everything you will need to play or run a game in *Dead Stars*, as well as rules for using the *Universal Decay* system in alternate genres incorporating everything from swords and sorcery to vehicle energy weapons, personal armor, nanotechnology, and starships.
