Frank Gehry at Gemini Frank O. Gehry, 2001 Built, Unbuilt and Imagined Sydney Anuradha Chatterjee, 2016-09-12 Built Unbuilt and Imagined Sydney presents the expanded field of architecture. It aims to show that the practice of architecture exceeds the work legally defensible under the title of the architect. Besides the design and construction of buildings, the disciplinary field of architecture consists of exhibition and display, discussions and lectures, competitions and visions of new public domains, interactions between art and architecture in the form of installations, performances and public art, and ideas on new directions for the practice of architecture. The book therefore places emphasis on practice as an intellectual activity in addition to the definition of the term informed by business and legal parameters. It is seen as the meaningful exercise of social, political and critical knowledge, skills and mindset in an urban spatial and tectonic condition. The practice is also a public act, mediated, legitimated and made meaningful through its articulation in various institutional, public and mediatic realms. The book focuses on built and unbuilt works, residential, commercial interiors and so on in Sydney, inclusive of public art, object or furniture design, key invited or public lectures, studios, current projects, making, competitions, collaborations, exhibitions, installations and outreach work. The focus is on the innovative and the original, not the ordinary or the purely commercial.

Sydney Opera House 1957-73 is one of the best-known buildings of the late twentieth century and perhaps Australia's most potent landmark; its white shell-like forms inextricably linked with the image of Sydney itself. A momentous breakthrough for the architecture of its time, Jørn Utzon's building remains monumental in contemporary world architecture across the world. Launched in 1991, the Architecture in Detail series attracted immediate acclaim and now comprises more than 60 titles. These books are highly collectable documents, each focusing in depth on a celebrated building. The series covers all sides of the vast spectrum of architecture from the past, present and future; the individual buildings are selected for their exceptional character, innovative design or technical virtuosity. Each volume contains a definitive text by a respected author, a sequence of color and black and white photographs, a series of technical drawings and a set of essential working details. These titles are vital to every architectural library, appealing to the professional and student alike, or indeed anyone with an appreciation of buildings.

Glenn Murcutt Françoise Fromont, 1995 Glenn Murcutt's singular status in contemporary architecture is well deserved. Respected and admired for his innovative designs, Murcutt is the first Australian architect whose work has attracted international attention. His work intimately linked to its landscape and to the Australian vernacular is clearly in the modern tradition and strongly responsive to current environmental concerns. This book documents this impassioned architect's body of work and offers a critical look at the background and influences that helped shape his architectural philosophy and
