University Rankings

William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan's higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

Malone, 2023-01-11 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific s share of the world s Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world s population and three of the world s five largest economies Asia is soon poised to home half of the world s middle class a class that is both the driver and the product of higher education The quality of a country s system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region s higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative This handbook presents a number of significant country case studies and documents cross cutting trends relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions *The Rise of Quality Assurance in Asian Higher Education* Mahsood Shah, Quyen T.N. Do, 2017-05-25 The Rise of Quality Assurance in Asian Higher Education provides information on the well researched quality assurance frameworks processes standards and internal and external monitoring that have taken place around the globe However in Asia where higher education has witnessed rapid growth and is also contributing significantly to international education which is benefited by many developed countries this data has not been readily available In recent years

Reforming Learning and Teaching in Asia-Pacific Universities Chi-hung Clarence Ng, Robert Fox, Michiko Nakano, 2016-05-06. This book focuses on learning and teaching as the core business of higher education and explores reformative efforts in response to the influences of globalised processes in three advanced economies in the Asia Pacific region: Japan, Hong Kong, and Australia. This is a significant book as it adds to limited discussions on the globalisation of learning, debates and scholarly reflections on the links between globalised processes and changing educational practices critical to understanding the current challenges and options available for charting future development for universities in the Asia Pacific region and beyond. It rejects an essentialising perspective that considers changes as inevitable and uniform. Instead, it considers negotiations, arguments, and even resistance as competing forces and integral components of the process of reforming pedagogical practices in Asia Pacific universities. This book discusses globalised processes as a new context for reforming learning and teaching, and its focused discussions cover topics including meeting the needs of new student groups, new technological practices, for change, use of English as an international language, and challenges in assessment and quality assurance.
