Over Martinus Nijhoff:

Over Martinus Nijhoff Jan Engelman, 1953 *Over Martinus Nijhoff. [Articles by Jan Engelman and A. Roland Holst, with the Text of a Lecture by M. Nijhoff "Over Eigen Werk."].* Martinus NIJHOFF (the Younger.), 1953 **Husserl on Ethics and**

Intersubjectivity Janet Donohoe, 2016-04-06 This book provides a compelling look at the importance of Husserl's methodological shift from his original purely static approach to his later genetic approach to the analysis of consciousness. The author shows that between 1913 and 1921 Husserl progressed in his thinking from a constitutive analysis of how something is experienced which focused primarily on the general structure of consciousness as an abstract unity to an investigation into the origins of the subject as a unique individual interacting with and growing within the surrounding environment. This much needed synthesis of Husserl's methodology will be of interest to scholars, phenomenologists and philosophers from both continental and analytic schools. Meinong and Husserl on Abstraction and Universals R. D.

Rollinger, 2023-03-13 The influence of Franz Brentano in twentieth century philosophy has been extensive. His two most famous and outstanding pupils were Alexius Meinong and Edmund Husserl. These two are closely related not only regarding their common background in the school of Brentano but also in their common concern with problems arising from British empiricism. Such a problem is to be found in the nominalist views of Locke, Berkeley and Hume and their concomitant theories of general ideas. While Meinong's early work continues in the empiricist tradition by characterizing general ideas in terms of abstraction and not in terms of general objects, universals as their correlates, Husserl's *Logical Investigations* are committed to the claim that general ideas can be described only as ideas which refer to general objects. In *Meinong and Husserl on Abstraction and Universals* the epistemological, psychological and ontological aspects of these theories are examined and compared. Included is also a translation of *Abstraction and Comparing* 1900 by Meinong. **Coastal State**

Jurisdiction over Living Resources in the Exclusive Economic Zone Camille Goodman, 2021-11-15 Under the 1982 United Nations Convention on the Law of the Sea, coastal States have sovereign rights to explore, exploit, conserve and manage the living resources of the 200 nautical mile exclusive economic zone (EEZ). However, 40 years after the adoption of the Convention, there is still a great deal of uncertainty about the nature and extent of these sovereign rights. *Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone* examines the ways in which coastal States can exercise authority on the basis of their sovereign rights over living resources in the EEZ. Dr. Camille Goodman explores the key concepts of fishing and fishing-related activities to establish what vessels and which activities can be regulated by coastal States, canvasses the criteria and conditions that coastal States can apply as part of regulating foreign access to their resources and considers the regulation of unlicensed foreign fishing vessels in transit through the EEZ. Goodman also examines how such regulations can be enforced within the EEZ and the circumstances under which enforcement can take place beyond the EEZ following hot pursuit. A review and analysis of the practice of 145 States identifies the contemporary

extent of coastal State jurisdiction over living resources in the EEZ and offers a unique fresh perspective on the underlying and enduring nature of that jurisdiction Underpinned by a rigorous examination of the Convention jurisprudence and literature as well as being supported by carefully documented State practice Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone proposes a more predictable framework within which to resolve jurisdictional challenges in the EEZ

Husserl and Heidegger on Being in the World Søren Overgaard, 2004-04-30 It is a study of the phenomenological philosophies of Husserl and Heidegger Through a critical discussion including practically all previously published English and German literature on the subject the aim is to present a thorough and evenhanded account of the relation between the two The book provides a detailed presentation of their respective projects and methods and examines several of their key phenomenological analyses centering on the phenomenon of being in the world It offers new perspectives on Husserlian and Heideggerian phenomenology e g concerning the importance of Husserl's phenomenology of the body the relationship between the Husserlian concept of constitution and Heidegger's notion of transcendence as well as in its argument that being designates the central phenomenon for both phenomenologists Though the study sacrifices nothing in terms of argumentative rigor or interpretative detail it is written in such a way as to be accessible and rewarding to non specialists and specialists alike

Children and International Human Rights Law Aisling Parkes, 2013-08-15 The United Nations Convention on the Rights of the Child 1989 is one of the most highly ratified human rights treaties in the world with 192 states currently signed up to it Article Twelve is fundamental to the Convention and states that all children capable of forming views have the right to express those views and recognises that all children have the right to be heard in any judicial and administrative proceedings affecting them This book explores the historical and theoretical background to Article Twelve and examines the various models of participation which have been created to facilitate a better understanding of this provision Aisling Parkes analyzes the extent to which Article Twelve has been implemented under international law and in domestic law as well as setting out recommendations for the most effective ways of implementing Article Twelve in all areas of children's lives

Elisabeth Mann Borgese and the Law of the Sea Tirza Meyer, 2022-03-21 In the late twentieth century as the United Nations struggled to come up with a new legal system for the oceans one woman saw the opportunity to promote radical new ideas of justice and internationalism Ocean governance expert Elisabeth Mann Borgese 1918 2002 spent decades working with the United Nations Law of the Sea Convention Throughout this sprawling series of global conferences she navigated allegiances and enmities intrigues and setbacks fighting determinedly to develop a just ocean order Featuring extensive research and new interviews with Mann Borgese's colleagues and family this book explores timeless questions of justice and international collaboration and asks whether the extraordinary drive and vision of a single person can influence the course of international law

Marine Pollution, Shipping Waste and International Law Gabriela Argüello, 2019-07-22 Waste management poses increasing challenges to both the protection of the environment and

to human health To face these challenges this book claims that environmental law needs to shift attention from media specific pollution regimes to integrative life cycle approaches of waste management i e from the prevention of waste generation to the actual handling of wastes Furthermore the cooperation of States and the establishment of coordinated activities is essential because states can no longer have separate standards for wastes posing transboundary risks and for purely domestic wastes Drawing upon both International and EU law the book provides a detailed analysis of the regimes set up to deal with the transboundary movement of wastes and ship source pollution so as to elucidate the obligations and legal principles governing such regimes It concludes that treaty obligations concerning transboundary movements of wastes are inapplicable to ship wastes while on board ships and on land However despite the limitations of the transboundary movement of wastes regime the principle of Environmentally Sound Management ESM embodied in this regime has gradually transformed into a legal principle ESM works to address the legal gaps in the regulation of wastes and consequently it provides the desired coherence to the legal system since it acts as a bridge between several regulatory and sectoral levels Furthermore ESM offers a new light with which to understand and interpret existing obligations and it provides a renewed impetus to regimes that directly and indirectly govern wastes This impetus translates into greater coordination and the establishment of cross sectional policies By offering alternative ways to solve problems linked to the management of ship wastes in the sea land interface this book will appeal to anyone with an interest in International Environmental Law

The UNECE Convention on the Protection and Use of Transboundary Watercourses and International Lakes Attila Tanzi, Owen McIntyre, Alexandros Kolliopoulos, Alistair Rieu-Clarke, Rémy Kinna, 2015-04-21 The UNECE Convention on the Protection and Use of Transboundary Watercourses and International Lakes provides invaluable insights into the contribution of this international agreement towards transboundary water cooperation via its legal provisions accompanying institutional arrangements and subsidiary policy mechanisms Contributing authors experts on key aspects of the Convention address a broad range of issues primarily concerning its development and evolution relationship with other multi lateral agreements regulatory framework and general principles tools for arresting transboundary pollution procedural rules compliance and liability provisions and select issues including its Protocol on Water and Health

The International Law on Ballast Water Maria Helena Fonseca de Souza Rolim, 2008-06-19 The introduction of invasive marine species into new environments whether by ships ballast water attached to ships hulls or via other means has been identified as one of the four main threats to the world s oceans along with land based sources of marine pollution over exploitation of living marine resources and the physical alteration or destruction of marine habitat Increased trade and the consequent greater volumes of maritime traffic over the last few decades have served to fuel the problem The effects in many areas of the world have been serious and significant Quantitative data show that the rate of bio invasions is continuing to increase in some cases exponentially and new areas are being found to be invaded all the time As volumes of seaborne trade continue overall to increase the problem may not yet have reached its peak In response IMO first adopted Guidelines for Preventing the Introduction of Unwanted Organisms and Pathogens from Ships Ballast Water and Sediment Discharges in 1991 while the United Nations Conference on Environment and Development UNCED held in Rio de Janeiro in 1992 recognized the issue as a major international concern The IMO Guidelines have since been kept constantly under review and updated Subsequently in February 2004 the International Convention for the Control and Management of Ships Ballast Water and

Sediments was adopted In providing a broad overview of the legal aspects related to marine pollution caused by ballast water and tank sediments this book offers a pragmatic analysis of the current international legal system and includes principles of international customary law and also references to a comprehensive environmental treaty law framework which relates the Ballast Water Convention to other treaties such as the United Nations Convention on the Law of the Sea UNCLOS MARPOL and the Convention on Biological Diversity With such a wide ranging approach this book will certainly provide a source of valuable information for all those with a requirement to pursue the subject in depth From the Foreword by Efthimios E

Mitropoulos **The Anthem Companion to Alfred Schutz** Michael Barber,2022-08-16 Given that Schutz was a philosopher and a social scientist this book will examine topics in Schutz s philosophical phenomenological theory of the social world such as the second person the face to face relationship the meaning of human action signs symbols relevance or interests Schutz s explanation of the social world however was meant to provide a philosophical foundation for the social sciences and so this book will also consider epistemological questions such as traditional knowledge and the opacity of knowledge and theory that is the neglected or unseen questions that accompany knowing or theorizing Also authors from within the Schutzian framework will address issues within the social sciences such as the Durkheimian aspects of Schutz s thought the sociology of knowledge and the theory of sociology It will also explore how Schutzian theory which is often viewed as a micro sociology can be extended to give an account of a macro sociological reality like modern society

Gesellschaft Ocean Governance and Conflict in the East and South China Sea Christian Schultheiss,2025-10-01 This book tells the story of the negotiations between China Japan Taiwan the Philippines Vietnam and other Southeast Asian countries about the East and South China Sea disputes Tapping into formerly classified and newly available primary sources the book meticulously tracks these negotiations and their sudden U turns It is a story about the promises and perils of cooperation as much about pragmatic gradual and surprisingly resilient approaches to conflict resolution and ocean governance as it is about the expansion of states bargaining power through institutions The book hinges on the question of when and why disputing parties reach agreement on joint oil and gas development fisheries and codes of conduct and when and why negotiations end in impasse It is the first comprehensive and theoretically informed study of decades long dispute settlement efforts in a central region of the Indo Pacific where the expansion of China challenges the law of the sea and regional security
