Synchronicity, Inspiration, and the Soul Rico Sneller, 2020-07-07 This book explores the notion of the human psyche soul and its continuing usefulness in the background of the ongoing and always accelerating techno scientific revolution The main argument here follows the assumption that this revolution while not necessarily being a threat to humankind is often blind or ignorant as to its subject the human being In the first chapters the reader is invited to reflect on the notion of thinking as a phenomenon of consciousness that transcends merely having thoughts Relating thinking to consciousness requires reconsidering the phenomena of inspiration and ecstasy Provided that such a thing as inspiration exists it makes sense to revise the solipsist or substantialist account often given of the human mind The book defines inspiration as a clairvoyance of

one's psyche and ecstasy as the experience of this clairvoyance. Next a case is made for synchronicity experiences as a key to a better understanding of the human psyche. While being enigmatic all throughout synchronicity experiences both on the individual and on the collective level help overcome both subject/object and body/mind dualisms. It is not likely though that the solution they could offer will be readily accepted by what is called science today since it challenges one of the latter's basic premises: causality. As a more concrete example of a condensed synchronicity experience the author dwells on physiognomy. In the final chapter death and suffering are discussed as extreme and therefore relevant experiences of consciousness. The book interprets death in terms of enhanced subliminality and suffering as unconscious resistance against maturing. Generally this book explores a psycho-philosophical tradition rooted in Romantic thinking from Schelling and Schopenhauer until Klages and Jung which has hitherto been unjustly neglected if not repressed by mainstream materialism and positivism. It makes a strong case for an intellectual account of the soul.

People (Jen), State and Inter-state Relations Huipeng Shang, 2023-10-17. This book explores the relationship between the human constant Jen of the four large-scale civilizational societies: China, the USA, Japan, and India, and their international behavior, response patterns, and interaction with the international system. The book analyzes the characteristics and limitations of the current international system as well as the way it is related to the Western type of human constant. It also analyzes the challenges facing China in its integration into the international system. This book aims to explore international relations from the combined psychological and cultural perspective. The key concept of this book is Jen, which contains a distinct Chinese cultural experience into the theory of international relations. Unlike other IR books that treat state as the main political actor, the book analyzes both the political aspects of state as an organizational entity and its civilizational aspects as a civilizational entity; hence it proposes a new ontology of international relations. By integrating the concept of Jen based on the unique Chinese cultural experience into the theory of international relations, the book reveals the interactive nature of relationship between the international system and human constant. The book explains the causal relationship between state's behavior and its human constant, analyzes the cultural characteristics of state actors and the international system, and tries to provide a new theoretical framework for understanding culture and modernity.

T. Suzuki on the Unconscious in Zen Art, Meditation, and Enlightenment Steve Odin, 2025-07-01 A comprehensive study of D T Suzuki's Zen philosophy and philosophical psychology in relation to his Buddhist understanding of the cosmic Unconscious This book explores how the Japanese philosopher D T Suzuki 1870 1966 developed an integral synthesis of Eastern and Western sources to establish a modern philosophical psychology of the cosmic Unconscious which he in turn used as the basis to interpret every aspect of Zen art meditation and enlightenment Beyond Freud's personal unconscious and Jung's collective unconscious according to Suzuki is the cosmic Unconscious of Zen which as absolute nothingness is the fountain of inexhaustible creative potentialities and the source of all Zen inspired arts The book demonstrates that like the Kyoto School of modern Japanese philosophy Suzuki's Zen endeavors to overcome the existential problem of nihilism or relative nothingness by shifting to the openness of absolute nothingness wherein emptiness is fullness and all things are disclosed in the evanescent beauty of their suchness Suzuki however formulates his scheme in terms of a depth psychology where the cosmic Unconscious is the encompassing locus of absolute nothingness Ultimately the book argues that by integrating both Eastern and Western views of the unconscious psyche including the different schools of Zen and Mahayana Buddhism as well as American French and German theories of the unconscious Suzuki's Zen concept of the cosmic Unconscious constitutes a significant original contribution to philosophical psychology
