Legal report on the ecosystem approach to fisheries in the Gambia Nakamura, J.N., Amador, T., 2022-09-09 Legislating for the ecosystem approach to fisheries. EAF is complex due to the holistic nature of the EAF involving multiple factors that underpin the social, economic, environmental and institutional aspects of fisheries sustainability. These factors include ecosystems integration, risks, intersectoral collaboration, research, participatory processes, monitoring, control, surveillance and enforcement among others. To assess how the EAF is being implemented through national policy and legal frameworks, FAO developed a diagnostic tool for implementing an ecosystem approach to fisheries through national policy and legal frameworks. The present legal report on the EAF used the diagnostic tool to assess the alignment of selected policy and legal instruments of Gambia with the EAF. This assessment analysed the extent to which 82 EAF legal requirements which are considered the minimum standards in legislating for the EAF are reflected in Gambia's policies and legislation relevant to the fisheries sector of the country and other relevant sectors such as environment, wildlife, ecosystems and maritime affairs. Based on this preliminary diagnosis, gaps were identified in the assessed instruments and recommendations were made for improving the implementation of the EAF. This report was elaborated following a participatory approach with the involvement of the national competent authorities of Gambia. Drafted in July 2021, the report was submitted to the national authorities of Gambia in November 2021. The Gambia Fisheries Department endorsed this EAF Legal Report of Gambia in April 2022. **OECD Public Governance Reviews Empowering Youth and Building Trust in**
