**Environmental Security** Peter Hough,2014-02-03 This student friendly textbook offers a survey of the competing conceptions and applications of the increasingly prominent notion of environmental security The book is divided into three sections In the first the key theoretical and practical arguments for and against bringing together environmental and security issues are set out The book then goes on to present how and why environmental issues have come to be framed in some quarters as national security concerns in the context of the effects of overpopulation resource depletion climate change and the role of the military as both a cause and a solution to problems of pollution and natural disasters Finally the third section explores the case for treating the key issues of environmental change as matters of human security Overall the book will provide a clear systematic and thorough overview of all dimensions of an area of great academic and real world political interest but one that has rarely been set out in an accessible textbook format hitherto This book will be essential reading for students of environmental studies critical and human security global governance development studies and IR in general

**Bombarded Britain: A Search For British Impact Structures** Richard Stratford,2004-07-26 This book describes a search for geological evidence of meteorite impact structures in Britain

The statistics of impact structures indicate that Britain should have Phanerozoic impact structures up to tens of kilometres in diameter. A constant theme is the importance of atmospheric break up of small asteroids and comets. These fragmenting bodies produce anomalously shallow craters with low rims and central peaks. Three British structures of this type are identified. Analysis of fireball statistics implies that damaging fireball explosions occur over the British Isles on a time scale of decades. On a time scale of millennia, however, more damage is done by Atlantic impact tsunamis.
