People and Computers XVI - Memorable Yet Invisible Xristine Faulkner,Janet Finlay,Francoise Detienne,2012-12-06 For the last 20 years the dominant form of user interface has been the Graphical User Interface GUl with direct manipulation As software gets more complicated and more and more inexperienced users come into contact with computers enticed by the World Wide Web and smaller mobile devices new interface metaphors are required The increasing complexity of software has introduced more options to the user This seemingly increased control actually decreases control as the number of options and features available to them overwhelms the users and information overload can occur Lachman 1997 Conversational anthropomorphic interfaces provide a possible alternative to the direct manipulation metaphor The aim of this paper is to investigate users reactions and assumptions when interacting with anthropomorphic agents Here we consider how the level of anthropomorphism exhibited by the character and the level of interaction affects these assumptions We compared characters of different levels of anthropomorphic abstraction from a very abstract character to a realistic yet not human character As more software is released for general use with anthropomorphic interfaces there seems to be no consensus of what the characters should look like and what look is more suited for different applications Some software and research opts for realistic looking characters for example Haptek Inc see http www haptek com others opt for cartoon characters Microsoft 1999 others opt for floating heads Dohi Takama Koda 1996 Koda Koda Maes 1996b   Universal Access in Human-Computer Interaction. Jain,Robert J. Howlett,2015-06-09 This book presents the 57 papers accepted for presentation at the Seventh KES International Conference on Intelligent Decision Technologies KES IDT 2015 held in Sorrento Italy in June 2015 The conference consists of keynote talks oral and poster presentations invited sessions and workshops on the applications and theory of intelligent decision systems and related areas The conference provides an opportunity for the presentation and

discussion of interesting new research results promoting knowledge transfer and the generation of new ideas The book will be of interest to all those whose work involves the development and application of intelligent decision systems

Contemporary Ergonomics and Human Factors 2013 Martin Anderson,2018-02-12 The broad and developing scope of ergonomics the application of scientific knowledge to improve people s interaction with products systems and environments has been illustrated for 27 years by the books which make up the Contemporary Ergonomics series This book presents the proceedings of the international conference on Contemporary Ergonomics   *Annual Review of Information Science and Technology* Blaise Cronin,2007 ARIST published annually since 1966 is a landmark publication within the information science community It surveys the landscape of information science and technology providing an analytical authoritative and accessible overview of recent trends and significant developments The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives While ARIST continues to cover key topics associated with classical information science e g bibliometrics information retrieval editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities   **Interactive Information Seeking, Behaviour and Retrieval** Ian Ruthven,Diane Kelly,2011 Information retrieval IR is a complex human activity supported by sophisticated systems Information science has contributed much to the design and evaluation of previous generations of IR system development and to our general understanding of how such systems should be designed and yet due to the increasing success and diversity of IR systems many recent textbooks concentrate on IR systems themselves and ignore the human side of searching for information This book is the first text to provide an information science perspective on IR Unique in its scope the book covers the whole spectrum of information retrieval including history and background information behaviour and seeking task based information searching and retrieval approaches to investigating information interaction and behaviour information representation access models evaluation interfaces for IR interactive techniques web retrieval ranking and personalization recommendation collaboration and social search multimedia interfaces and access Readership Senior undergraduates and masters level students of all information and library studies courses and practising LIS professionals who need to better appreciate how IR systems are designed implemented and evaluated   *Creativity and HCI: From Experience to Design in Education* Paula Kotzé,William Wong,Joaquim Jorge,Alan Dix,Paula Alexandra Silva,2008-11-21 International Federation for Information Processing The IFIP series publishes state of the art results in the sciences and technologies of information and communication The scope of the series includes foundations of computer science software theory and practice education computer applications in technology communication systems systems modeling and optimization information systems computers and society computer systems technology security and protection in information processing systems artificial intelligence and human computer interaction Proceedings and post proceedings of refereed international conferences in computer science and interdisciplinary fields are

featured These results often precede journal publication and represent the most current research The principal aim of the IFIP series is to encourage education and the dissemination and exchange of information about all aspects of computing For more information about the 300 other books in the IFIP series please visit www springer com   Human-computer Interaction, INTERACT '03 Matthias Rauterberg,Marino Menozzi,Janet Wesson,2003 This work brings together papers written by researchers and practitioners actively working in the field of human computer interaction It should be of use to students who study information technology and computer sciences and to professional designers who are interested in User Interface design   **HCI Beyond the GUI** Philip Kortum,2008-06-13 As technology expands and evolves one dimensional graphical user interface GUI design becomes increasingly limiting and simplistic Designers must meet the challenge of developing new and creative interfaces that adapt to meet human needs and technological trends HCI Beyond the GUI provides designers with this know how by exploring new ways to reach users that involve all of the human senses Dr Kortum gathers contributions from leading human factors designers to present a single reference for professionals researchers and students Explores the human factors involved in the design and implementation of the nontraditional interfaces detailing design strategies testing methodologies and implementation techniques Provides an invaluable resource for practitioners who design interfaces for children gamers and users with accessibility needs Offers extensive case studies examples and design guidelines   **Selected Issues in Experimental Economics** Kesra Nermend,Małgorzata Łatuszyńska,2016-03-24 The aim of this volume is to provide deep insights and the latest scientific developments and trends in experimental economics Derived from the 2015 Computational Methods in Experimental Economics CMEE conference this book features papers containing research and analysis of economic experiments concerning research in such areas as management science decision theory game theory marketing and political science The goal is to present possibilities for using various computer methods in the scope of experimental economics to further provide researchers with a wide variety of tools The field of experimental economics is rapidly evolving Modern use of experimental economics requires the integration of knowledge in the domains of economic sciences computer science psychology and neuroscience Recent research includes experiments conducted both in the laboratory and in the field and the results are used for testing and a better understanding of economic theories Researchers working in this field use mainly a set of well established methods and computer tools that support the experiments Methods such as artificial intelligence computer simulation and computer graphics however are not represented enough in experimental economics studies and most experimenters do not consider their usage The goal of the conference and the enclosed papers is to allow for an exchange of experiences and to promote joint initiatives to insight change in this trend   Enterprise Interoperability Bernard Archimède,Bruno Vallespir,2017-05-16 Interoperability of enterprises is one of the main requirements for economical and industrial collaborative networks Enterprise interoperability EI is based on the three domains architectures and platforms ontologies and enterprise modeling This book presents the EI vision of the Grand

Sud Ouest pole PGSO of the European International Virtual Laboratory for Enterprise Interoperability INTEROP VLab It includes the limitations concerns and approaches of EI as well as a proposed framework which aims to define and delimit the concept of an EI domain The authors present the basic concepts and principles of decisional interoperability as well as concept and techniques for interoperability measurement The use of these previous concepts in a healthcare ecosystem and in an extended administration is also presented **Human-Computer Interaction** Constantine Stephanidis,Gavriel Salvendy,2024-09-28 The pervasive influence of technology continuously shapes our daily lives From smartphones to smart homes technology is revolutionizing the way we live work and interact with each other Human computer interaction HCI is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications   Video Games Nicholas David Bowman,2018-07-16 This entry in the BEA Electronic Media Research Series born out of the April 2017 BEA Research Symposium takes a look at video games outlining the characteristics of them as cognitive emotional physical and social demanding technologies and introduces readers to current research on video games The diverse array of contributors in this volume offer bleeding edge perspectives on both current and emerging scholarship The chapters here contain radical approaches that add to the literature on electronic media studies generally and video game studies specifically By taking such a forward looking approach this volume aims to collect foundational writings for the future of gaming studies   **Biometric Authentication** Davide Maltoni,Anil K. Jain,2004-09-21 Biometric authentication is increasingly gaining popularity in a large spectrum ofapplications rangingfromgovernmentprograms e g nationalIDcards visas for international travel and the ght against terrorism to personal applications such as logical and physical access control Although a number of e ective lutions are currently available new approaches and techniques are necessary to

overcomesomeofthelimitationsofcurrentsystemsandtoopenupnewfrontiers in biometric research and development The 30 papers presented at Biometric Authentication Workshop 2004 BioAW 2004 provided a snapshot of current research in biometrics and identify some new trends This volume is composed of vesections facerecognition ngerprintrecognition templateprotectionand security other biometrics and fusion and multimodal biometrics For classical biometrics like ngerprint and face recognition most of the papers in Sect 1 and 2 address robustness issues in order to make the biometric systems work in suboptimal conditions examples include face detection and recognition der uncontrolled lighting and pose variations and ngerprint matching in the case of severe skin distortion Benchmarking and interoperability of sensors and liveness detection are also topics of primary interest for ngerprint based s tems Biometrics alone is not the solution for complex security problems Some of the papers in Sect 3 focus on designing secure systems this requires dealing with safe template storage checking data integrity and implementing solutions in a privacy preserving fashion The match on tokens approach provided that current accuracy and cost limitations can be satisfactorily solved by using new algorithms and hardware is certainly a promising alternative The use of new biometric indicators like eye movement 3D nger shape and soft traits e g
