Peoples Participation In Himalayan Eco System Development Plan For Action:

People's Participation in Himalayan Eco-system Development M. L. Dewan, 1990 People's Movement for Himalayan Rejuvenation M. L. Dewan, Pivoosh Rautela, 2001 Meta-analysis to Assess Impact of Watershed Program and **People's Participation**, 2005 With reference to watershed programs in India **Seminar** ,1991 Climate Change and its Ecological Implications for the Western Himalaya V. L. Chopra, 2013-01-01 In its thirteen chapters this book deals with biophysical biological hydrological meteorological and socio economic aspects of western Himalayan region of India It emphasizes on the need for strengthening institutional and research capacities that are critical to delivering meaningful and sustainable outcomes impacts in return for the investments made It also makes recommendations for the policy planning and administrative interventions reforms necessary for efficient and equitable delivery of benefits to the intended beneficiaries and for conservation of the valuable natural resources of the region Each chapter has been prepared by a recognized expert in the identified area and the treatment bears the required mark of quality authenticity **Redefining Forestry for Effective Livelihoods** Prodyut Bhattacharya, 2017-10-23 Forests play a very important part in the rural economy The rural population largely depends on forests for their livelihoods Degradation and deforestation of forests have a negative impact on the rural people They increase suffering and poverty At the same time they pose a serious global environmental threat It is necessary that the livelihood option of rural population is secured while forest resources augmented This can be done through participatory management Redefining Forestry for Effective Livelihoods brings out key issues relevant to forest and livelihood with a special focus on non timber forest produce It gives a detailed analysis about how forests play an important role in maintaining earth's ecosystem and thus the vital balance of flora and fauna The book also discusses the contribution of forests to the national economy It also focuses on emerging research issues arising out of various policies and their impact on the forest dependent poor The book provides the essential findings arguments linkage of forestry sector with other development scenario and the possible way out for the future This comprehensive book is a useful reference for researchers policymakers and development practitioners working in the area of forest and livelihood Himalayas, Environmental Projects with People Peter Oakley, 1991 People's participation has begun to influence the **Problems** S. K. Chadha, 1990 practice of development substantially This study provides an interpretation of how participation occurs uses case studies to highlight various approaches and develops elements of a strategy and a methodology Uttaranchal Himalaya Maheshwar P. Joshi, Lalita Prabhā Jośī, 1995 Contributed articles on the civilization of Kumaun and Garhw l India **Environmental** Sustainability from the Himalayas to the Oceans Shikui Dong, Jayanta Bandyopadhyay, Sanjay Chaturvedi, 2017-01-23 The book is written in the backdrop of the environmental impacts of and future requirements from the natural environment for rapid economic growth that has characterized recent economic history of China and India especially over the past few decades The environmental impacts of such rapid economic changes have been more frequently than otherwise degrading in

character Environmental impacts of economic activities create degraded natural ecosystems by over utilization of nature s provisioning ecosystem services from Himalaya to the Ocean as well by the use of the natural environment as sink for dumping of unmarketable products or unused inputs of economic activities Such processes affect wide range of ecosystem processes on which the natural environment including human population depend on Critical perspectives cast by various chapters in this book draw attention to the various ways in which space and power interact to produce diverse geographies of sustainability in a globalizing world They also address the questions such as who decides what kind of a spatial arrangement of political power is needed for sustaining the environment Who stands to gain or lose what when where and why from certain geographical areas being demarcated as ecologically unique fragile and vulnerable environments Whose needs and values are being catered to by a given ecosystem service What is the scope for critical inquiry into the ways in which the environment is imagined represented and resisted in both geopolitical struggles and everyday life The book provides insights to both academics from diverse disciplines and policy makers civil society actors interested in mutual exchange of knowledge IASSI Quarterly ,1993 between China and India People and Mountain Environments Anwesha Borthakur, Pardeep Singh, 2025-05-02 People living in the mountains maintain a unique relationship with their surrounding environment Humans have settled in mountainous regions all across the globe for centuries adapting to the challenging terrains and establishing exceptional cultural practices and lifestyles Until today they depend on their immediate ecosystems for their everyday necessities while also conserving those environments through their own traditional practices and belief systems Understanding and addressing the ease and complexities of the relationship between people and mountains is essential for sustainable development through overall conservation and well being of both the environment and the communities living in these regions The mountain communities in the Himalayas and their interconnectedness with their surroundings could provide important insights in this regard For instance the interaction between humans and mountains in the Himalayas is diverse spanning across various cultural economic political environmental and recreational dimensions and parameters As sustainable development is a core goal of the world today it is both interesting and pertinent to explore these various aspects and locate possible learnings in the present day global environmental scenario Accordingly this book is an attempt to situate the interconnected between people and the mountains in the Himalayan landscape towards tracing learnings for sustainable development Our aim is to edit a holistic volume where aspects ranging from ecosystem services to cultural and spiritual significances of the mountains for the local communities and from contributions of the Himalayas in relation to water agriculture and food practices to the challenges associated with haphazard infrastructural developments and environmental justice implications are adequately addressed We acknowledge that balancing the human needs of the mountain communities while ensuring environmental conservation is a major challenge Ecologically fragile and biodiversity rich the Himalayan region is no exception Further mountain communities in the Himalayas are facing tremendous challenges in adapting to

changing climate conditions such as altered precipitation patterns and increased frequency of extreme weather events Unsustainable economic activities in the form of chaotic tourism practices and infrastructural developments among others add to the emerging challenges Accordingly it is important to put research efforts towards active sustainable development practices where human needs are met while minimizing undesirable impacts on the Himalayan mountain ecosystems The Himalayas are critical for global ecological balance Therefore this book will not only be helpful for the countries situated in these mountain regions alone but also will provide useful insights for environmental sustainability at a much larger global The Ecology & Environment Compendium for IAS Prelims General Studies CSAT Paper 1, UPSC & State PSC Disha scale Experts, 2017-07-13 The Ecology Environment Compendium is the Most Updated Material for Ecology covering the social political and economic aspects of Climate Change Sustainable Development and Environmental Management The emphasis of the book has been on Policies Summits Reports Initiatives new terms Judgements etc which are important from the point of view of the exam The book captures most of the important questions with explanations of the past years of the IAS Prelim exam CDS NDA and other competitive exams distributed in the various chapters The book is divided into 9 chapters followed by 2 levels of exercises with 700 Simple MCQs statement based MCQs **Grassroots Environmental Action Dharam** Ghai, Jessica M. Vivian, 2014-01-14 Managing resources sustainably on the local level is essential for achieving the global goal of sustainable development The importance of people's participation for sustainable development has recently become increasingly acknowledged yet there is little understanding of the multiple dimensions that such participation involves Grassroots Environmental Action questions the viability of traditional management systems Case studies from Latin America Asia and Africa focus on areas where local people are vigorous actors in the determination of their own future and that of their environment Sustainable Ecological Restoration and Conservation in the Hindu Kush Himalayan Region Zhanhuan Shang, A. Allan Degen, Devendra Gauchan, Madan Koirala, Muhammad Khalid Rafig, 2024-06-25 The years 2021 to 2030 have been designated as The United Nations Decade on Ecosystem Restoration Ecological restoration and biodiversity conservation efforts face unprecedented challenges especially in developing countries and areas such as the Hindu Kush Himalayan HKH region This huge HKH region which includes areas in eight separate countries Afghanistan Pakistan Nepal India China Bangladesh Myanmar and Bhutan is a biodiversity hotspot with a vast array of ecosystems landscapes peoples and cultures It is known as one of the pulses of the world However the HKH is also the world s largest and poorest mountain region where landscapes and environments have been severely damaged as a result of climate change and human activities Coordinating conservation and restoration policies sharing knowledge and funds and maintaining livelihoods are major challenges and are in urgent need of improvement This book details the past and current ecological problems in the HKH region and the threats and challenges that ecosystems and local people face It pays special attention to developments of transformative adaptations and presents examples of sustainable conservation and ecological restoration management

practices This book is essential reading for ecologists and conservation biologists involved in large scale ecological restoration projects along with practitioners graduate students policy makers and international development workers

Ecological Footprints of Climate Change Uday Chatterjee, Angela Oyilieze Akanwa, Suresh Kumar, Sudhir Kumar Singh, Abira Dutta Roy, 2023-01-01 This book explores global implications of human activities that trigger changes in climate and the appropriate scientific adaptive and sustainable approaches as a proven information tool It reveals that the ecological social and economic dynamics of the changing earth encompasses huge uncertainties coupled with its ability to be linked to other forms of global change From a scientific perspective multiple efforts are expedient to integrate the many aspects of global changes Increases in science and technology have afforded nations the ability to plan for the future by investing in adaptive and mitigative measures to monitor present and future changes Just as the climatic and ecological impacts of climate change are unequally distributed so is the adaptive capacity to cope with these impacts in different nations Considering that wealth infrastructure and political stability all contribute to a nation s capacity to anticipate and respond to change So global South nations who are disadvantaged in these areas are faced with more inequalities and more unique adaptive strategies. There is need for increased aggregate efforts and interaction between scientists stakeholders and policy makers to improve both decision making and global change in science Scientists and researchers need to work on expanding the range of polices that are proposed debated and implemented This way novelty new ideas and methodologies are infused into the society At this point of multiple climate footprints there is an immense need to explore all ideas evaluating their possibilities in presenting alternative futures developing alternative policies and adaptive options to solve the intractable ecological footprints of climate change Status of Indian Forestry P.
