

Peppered Moths: Natural Selection in Black & White

Objective: Simulate changes in moth population due to pollution and predation, and observe how species can change over time.

Introduction: Charles Darwin accumulated a tremendous collection of facts to support the theory of evolution by natural selection. One of his difficulties in demonstrating the theory, however, was the lack of an example of evolution over a short period of time, which could be observed as it was taking place in nature. Although Darwin was unaware of it, remarkable examples of evolution, which might have helped to persuade people of his theory, were in the countryside of his native England. One such example is the evolution of the peppered moth *Biston betularia*.

The economic changes known as the industrial revolution began in the middle of the eighteenth century. Since then, tons of soot have been deposited on the country side around industrial areas. The soot discoloured and generally darkened the surfaces of trees and rocks. In 1848, a dark-coloured moth was first recorded. Today, in some areas, 90% or more of the peppered moths are dark in colour. More than 70 species of moth in England have undergone a change from light to dark. Similar observations have been made in other industrial nations, including the United States.

Instructions:

Go to the link below to read more information on Kettlewell's study of moths. At the end, you will run two simulations for 5 minutes each, during this time you will play the part of a bluejay that eats moths.

After 5 minutes record the % of dark moths and light moths you will need this information later.

Darwin's Reach Norman A. Johnson, 2021-12-27 The application of evolutionary biology addresses a wide range of practical problems in medicine agriculture the environment and society Such cutting edge applications are emerging due to recent advances in DNA sequencing new gene editing tools and computational methods This book is about applied evolution the application of the principles of and information about evolutionary biology to diverse practical matters Although applied evolution has existed unrecognized for a very long time today s version has a much wider scope Evolutionary medicine has formed into its own discipline Evolutionary approaches have long been employed in agriculture and in conservation biology But Darwin s reach now extends beyond just these three fields It now also includes forensic biology and the law Ideas from evolutionary biology can be used to inform policy regarding foreign affairs and national security Applied evolution is not only interdisciplinary but also multidisciplinary Consequently this book is for experts in one field who are interested in expanding their evolutionary horizons It is also for students at the undergraduate and graduate levels One of the public relations challenges faced by evolutionary biology is that most people do not see it being all that relevant to their daily lives Even many who accept evolution do not grasp how far Darwin s reach extends This book will change that perception Key Features Emphasizes the expanding role evolutionary biology has in today s world Includes examples from medicine law agriculture conservation and even national security Summarizes new technologies and

computational methods that originated as innovations based in part or whole on evolutionary theory Current Has extensive coverage of the COVID 19 pandemic and other recent topics Documents the important role evolution plays in everyday life Illustrates the broadly interdisciplinary nature of evolutionary theory Resources The applications of evolutionary biology are far too numerous to include in just one book Plus new scientific findings emerge almost every day underscoring the central role evolution plays in our lives The author has established a blog site to highlight these fascinating discoveries Please visit <https://darwinsreach.com> to be inspired by endless forms most beautiful and most wonderful that have been and are being evolved the last line of Charles Darwin s *The Origin of Species* *Science and Faith?* C. John Collins,2003-10-15 Many believers worry that science undermines the Christian faith Instead of fearing scientific discovery Jack Collins believes that Christians should delight in the natural world and study it God s truth will stand against any challenge and will enrich the very scientific studies that we fear Collins first defines faith and science shows their relation and explains what claims each has concerning truth Then he applies the biblical teaching on creation to the topics of conflict between faith and science including the age of the earth evolution and miracles He considers what it means to live in a created world This book is for anyone looking for a Christian engagement with science without technical jargon **Evolution** Christopher H. K. Persaud,2007-12 Darwinian evolution is taught unreservedly to students of science around the world as incontrovertible truth even though many aspects of the theory have been thoroughly discredited while others are woefully lacking in corroboration from a standpoint of proper scientific precept and practice Practical and honest scientists increasingly are acknowledging that evolutionism is biologically and mathematically impossible The outlandish premise is at odds with the laws of physics and manifestly incompatible with genuine geological and paleontological criteria for aging and classifying rocks strata and fossils Evolutionary theory s ostracism of God as a supreme designer and creator of the universe and of life has emboldened many of history s most ruthless dictators who have embraced its disturbing message to commit crimes of unspeakable evil Many millions of people have lost their lives as demagogues fueled by evolutionist inclinations have sought to legitimize sinister proclivities such as racism bigotry eugenics and ethnic cleansing among other perpetrations of antipathy and wickedness It is not unreasonable to assume that many of today s social and behavioral thinkers as well as misguided scientists who support evolutionary theory also nurture predilections that are far removed from wholesome deportment and espouse leanings that show scant respect for the sanctity of human life Evolutionary thought falls outside the precincts of essential moral contemplation and is beyond the realm of real science **Arun Deep's Self-Help to ICSE Biology Class 10 : 2024-25 Edition (Based on Latest ICSE Syllabus)** Sunil Manchanda,2024-03-01 Arun Deep s Self Help to ICSE Biology Class 10 has been meticulously crafted to meet the specific needs of 10th grade ICSE students This resource is designed to comprehensively guide students in preparing for exams effectively ensuring the attainment of higher grades The primary aim of this book is to assist any ICSE student in achieving the best possible grade by providing
