Perception, Empathy, and Judgment Arne Johan Vetlesen, 1994 Includes bibliographical references and index

What We Owe to Nonhuman Animals Gary Steiner, 2023-09-27 This book strongly challenges the Western philosophical tradition's assertion that humans are superior to nonhuman animals. It makes a case for the full and direct moral status of nonhuman animals. The book provides the basis for a radical critique of the entire trajectory of animal studies over the past fifteen years. The key idea explored is that of felt kinship, a sense of shared fate with and obligations to all sentient life. It will help to inspire some deep rethinking on the part of leading exponents of animal studies. The book's strong outlook is expressed through an appeal for radical humility on the side of humans rather than a constant reference to the human-animal divide. Historical figures examined in depth include Aristotle, Seneca, and Kant; contemporary figures examined include Christine Korsgaard and Martha Nussbaum. This book presents an account according to which the tradition has not proceeded on the basis of impartial motivations at all but instead has made a set of pointedly self-serving assumptions about the proper criteria for assessing moral worth. Readers of this book will gain exposure to a wide variety of thinkers in the Western philosophical tradition, historical as well as contemporary. This book is suitable for professionals working in nonhuman animal studies, students, advanced undergraduates, and practitioners working in the fields of philosophy, environmental studies, law, literature, anthropology, and related fields.

The Heart of Judgment Leslie Paul Thiele, 2006-09-04 The Heart of Judgment explores the nature, historical significance, and continuing relevance of practical wisdom. Primarily a work in moral and political thought, it also relies extensively on research in cognitive neuroscience to confirm and extend our understanding of the faculty of judgment. Ever since the ancient Greeks first discussed practical wisdom, the faculty of judgment has been an important topic for philosophers and political theorists. It remains one of the virtues most demanded of our public officials. The greater the liberties and responsibilities accorded to citizens in democratic regimes, the more the health and welfare of society rest upon their exercise of good judgment. While giving full credit to the roles played by reason and deliberation in good judgment, the book underlines the central importance of intuition, emotion, and worldly experience.

Heidegger and Practical Philosophy François Raffoul, David Pettigrew, 2012-02-01 Heidegger has often been reproached for his alleged neglect of practical issues, specifically his inability to propose or articulate an ethics or politics. This book investigates the extent to which Heidegger's thought can be read as a crucial resource for practical philosophy and the articulation of an ethos for our time. Leading scholars from around the world offer a sustained and intensive focus on Heidegger's thought of praxis, working through such motifs as freedom, the possibility of ethics, the political responsibility, community, nihilism, technology, and the contemporary ethos, among others. Ultimately, this volume reveals the practical senses of ontology and the ontological senses of praxis by exhibiting the practicality of Being itself.

Ethics and Finitude Lawrence J. Hatab, 2000-05-24 This book explores what anyone interested in ethics can draw from Heidegger's

thinking Heidegger argues for the radical finitude of being But finitude is not only an ontological matter it is also located in ethical life Moral matters are responses to finite limit conditions and ethics itself is finite in its modes of disclosure appropriation and performance With Heidegger s help Lawrence Hatab argues that ethics should be understood as the contingent engagement of basic practical questions such as how should human beings live

Visualizing Atrocity Valerie Hartouni,2012-08-20 Visualizing Atrocity takes Hannah Arendt s provocative and polarizing account of the 1961 trial of Nazi official Adolf Eichmann as its point of departure for reassessing some of the serviceable myths that have come to shape and limit our understanding both of the Nazi genocide and totalitarianism s broader constitutive and recurrent features These myths are inextricably tied to and reinforced viscerally by the atrocity imagery that emerged with the liberation of the concentration camps at the war s end and played an especially important evidentiary role in the postwar trials of perpetrators At the 1945 Nuremberg Tribunal particular practices of looking and seeing were first established with respect to these images that were later reinforced and institutionalized through Eichmann s trial in Jerusalem as simply part of the fabric of historical fact They have come to constitute a certain visual rhetoric that now circumscribes the moral and political fields and powerfully assists in contemporary mythmaking about how we know genocide and what is permitted to count as such In contrast Arendt s claims about the banality of evil work to disrupt this visual rhetoric More significantly still they direct our attention well beyond the figure of Eichmann to a world organized now as then by practices and processes that while designed to sustain and even enhance life work as well to efface it

Embodied Cognition and Cinema Peter Kravanja,2015-07-31 The impact of the embodied cognition thesis on the scientific study of film The embodied cognition thesis claims that cognitive functions cannot be understood without making reference to the interactions between the brain the body and the environment The meaning of abstract concepts is grounded in concrete experiences This book is the first edited volume to explore the impact of the embodied cognition thesis on the scientific study of film A team of scholars analyse the main aspects of film narrative style music sound time the viewer emotion perception ethics the frame etc from an embodied perspective By combining insights from various disciplines such as cognitive film theory conceptual metaphor theory and cognitive neuroscience they show how the process of meaning making in film is embodied and how empathy and embodied simulation play a role in understanding the way in which the viewer interacts with the film Foreword by Mark Johnson Knight Professor of Liberal Arts and Sciences Department of Philosophy University of Oregon Contributors Warren Buckland Oxford Brookes University Juan Chattah University of Miami Maarten Co gnarts University of Antwerp Adriano D Aloia Universit Cattolica del Sacro Cuore Milan Michele Guerra University of Parma Mikl s Kiss University of Groningen Peter Kravanja KU Leuven Mar a J Ortiz University of Alicante Mark S Ward University of Technology Sydney Hannah Chapelle Wojciehowski University of Texas
