removing perchlorate Its natural occurrence and its unique isotopic signature between natural and anthropogenic sources and novel detection techniques are discussed A description of the perchlorate chemistry microbiology biochemistry genetics geochemical occurrences and environmental forensics toxicology and risk assessment to engineering solutions and policy is provided Also included are remediation technologies and monitoring tools for cleaning up contaminated sites including bioremediation selective and regenerable ion exchange modified granular activated carbon and catalyzed destruction

**The Salton Sea Centennial Symposium** Stuart H. Hurlbert, 2009-01-29 This volume deals with many aspects of the physical and chemical limnology of the Salton Sea California's largest lake and a lake that may soon to be the object of a multi billion dollar restoration project Formed in 1905 by an accidental breaching of outtake structures on the Colorado River and maintained since then by large and steady inflows of agricultural wastewaters it has long served as an important habitat for fish and waterbirds and as a major recreational area for people Highly eutrophic and with a salinity that is steadily rising and now nearly 50 g/L it is a lake in great trouble Most fish species have disappeared and large fish and bird dieoffs have been common in recent decades Many of the papers in this volume represent studies undertaken with the aim of informing the re engineering of this ecosystem so that its value to wildlife and man can be restored or enhanced *Green*

*Energetic Materials* Tore Brinck, 2014-01-15 This comprehensive book presents a detailed account of research and recent developments in the field of green energetic materials including pyrotechnics explosives and propellants This area is attracting increasing interest in the community as it undergoes a transition from using traditional processes to more environmentally friendly procedures The book covers the entire line of research from the initial theoretical modelling and design of new materials to the development of sustainable manufacturing processes It also addresses materials that have already reached the production line as well as considering future developments in this evolving field **Nanotechnology**

**and the Environment** Kathleen Sellers, Christopher Mackay, Lynn L. Bergeson, Stephen R. Clough, Marilyn Hoyt, Julie Chen, Kim Henry, Jane Hamblen, 2008-07-30 Nanomaterials unique properties offer revolutionary means to optimize a variety of products including electronics textiles paintings and coatings pharmaceuticals and personal care products However these same properties mean that nanoscale materials can behave differently in the human body and the environment than conventional materials **Chemistry of Pyrotechnics** Chris Mocella, John A. Conkling, 2019-01-15 This book provides

chemists with technical insight on pyrotechnics and explosives It emphasizes basic chemical principles and practical hands on knowledge in the preparation of energetic materials It examines the interactions between and adaptations of pyrotechnics to changing technology in areas such as obscuration science and low signature flame emission The updated third edition discusses chemical and pyrotechnic principles components of high energy materials elements of ignition propagation and sensitivity It offers heat compositions including ignition mixes delays thermites and propellants and investigates the production of smoke and sound as well as light and color **Waste Water** Fernando Sebastián García Einschlag, 2011-04-01

The steady increase in industrialization urbanization and enormous population growth are leading to production of huge quantities of wastewaters that may frequently cause environmental hazards This makes waste water treatment and waste water reduction very important issues The book offers a collection of studies and findings concerning waste water treatment minimization and reuse

**Aquananotechnology** David E. Reisner, T. Pradeep, 2014-09-24 The world's fresh water supplies are dwindling rapidly even wastewater is now considered an asset By 2025 most of the world's population will be facing serious water stresses and shortages Aquananotechnology Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of water

*Dam Nation* Stephen Grace, 2013-05-07 In the scramble to claim water rights in the West during the fevered days of early emigration and expansion running out of water was rarely a concern and the dam building fever that transformed the West in the 19th and 20th centuries created a map of the region that may be unsustainable Throughout the arid American West metropolitan areas such as Los Angeles Phoenix Las Vegas and Denver need water These cities are growing but water supplies are dwindling Scientists agree that the West is heating up and drying out leading to future water shortages that will pose a challenge to existing laws *Dam Nation* looks first to the past to the stories of the California gold rush and the earliest attempts by men to shape the landscape and tame it takes us to the Great American Desert and the settlement of the west under the theory that rain follows the plow and then takes on the ongoing legal and moral battles in the West Author Stephen Grace is a novelist a storyteller and the author of several non-fiction books on Colorado He weaves the facts into a compelling narrative that informs entertains and tells an important story
