Percy Jackson 4 Read Online:

From Text to Epitext Shelbie Witte, Melissa Gross, Don Latham, 2021-03-02 This volume explains how analyzing textual elements that aren't part of the text but connected to it can be used with K-16 students to improve comprehension, engagement, critical thinking, and media literacy. Beginning with an introduction that briefly explains Genette's theory of paratext and discusses the functions of epitext theory, this book comprises theory-to-practice chapters that showcase ways in which teachers and librarians can use elements independent of a text to discuss texts and media with students. Chapters include a practitioner's section specifying practical approaches and explanations for how to use epitext. Scaffolding an application of theory to practice, this title provides educators with an original approach to increasing literacy engagement and integration as well as for increasing media literacy and critical thinking. It includes practical ideas for using epitext in the classroom to promote critical thinking and for collaboration between teachers and librarians. It also includes editorial sidebars that provide additional how-to ideas, support deep thinking, make connections to relevant content in other chapters, and provide examples for students in K-16 classrooms. *Cataloging for School Librarians* Marie Kelsey, Jen

Spisak, 2023-07-18 This easy-to-use text teaches school librarians how to catalog materials using RDA. By following the instructions in this book, the new cataloger will become proficient at creating bibliographic records that meet current national standards and make library materials accessible to students and faculty. *Cataloging for School Librarians* Third Edition presents the theory and practice of cataloging and classification to students and practitioners needing a clear sequential process to help them overcome cataloging anxiety. By following the instructions in this book, the new cataloger will become proficient at creating bibliographic records that meet current national standards and make library materials accessible to students and faculty. This new edition fully integrates RDA, FRBR, Sears, and the Dewey Decimal Classification. It covers numerous examples of how to catalog books, non-print, and electronic library materials and 3D objects using the MARC format. Appendices include MARC Record examples across formats, cheat sheets, and a compilation of a one-stop shop list of commonly used website resources mentioned throughout the book. A glossary and an index are also included.
