Visible Learning for Science, Grades K-12 John Almarode, Douglas Fisher, Nancy Frey, John Hattie, 2018-02-15. In the best science classrooms, teachers see learning through the eyes of their students, and students view themselves as explorers. But with so many instructional approaches to choose from— inquiry, laboratory, project-based learning, discovery learning, which is most effective for student success? In *Visible Learning for Science*, the authors reveal that it's not which strategy but when and how to use it that is vital. A K-12 framework for choosing the right approach at the right time, depending on where students are within the three phases of learning— surface, deep, and transfer. Synthesizing state-of-the-art science instruction and assessment with over fifteen years of John Hattie's cornerstone educational research, this framework for maximum learning spans the range of topics in the life and physical sciences. Employing classroom examples from all grade levels, the authors empower teachers to plan, develop, and implement high-impact instruction for each phase of the learning cycle. Surface learning: when, through precise approaches, students explore science concepts and skills that give way to a

deeper exploration of scientific inquiry Deep learning when students engage with data and evidence to uncover relationships between concepts students think metacognitively and use knowledge to plan investigate and articulate generalizations about scientific connections Transfer learning when students apply knowledge of scientific principles processes and relationships to novel contexts and are able to discern and innovate to solve complex problems Visible Learning for Science opens the door to maximum impact science teaching so that students demonstrate more than a year s worth of learning for a year spent in school Interactive Notetaking for Content-Area Literacy, Secondary Judith Goodman,2018-04-02 Help students build
