D. Sandole, 2010 In this work Dennis Sandole explores the theory and practice of peacebuilding discussing the differences and similarities between core aspects of peace processes namely violent conflict prevention conflict management conflict settlement conflict resolution and conflict transformation **Examining Net Zero** Alex de Ruyter, Steven McCabe, Beverley Nielsen, 2025-02-10 In Examining Net Zero authors delve into seven case studies illustrating economic and political issues tied to climate change and the transition to sustainable systems addressing challenges and progress towards the UN Sustainable Development Goals *The Demographic Transformations of Citizenship* Heli Askola, 2016-09-15 This book examines how demographic changes including low birth rates continuing immigration and population ageing are transforming ideas about citizenship and belonging The Rough Guide to The Future Jon Turney, 2010-11-01 Find the future now with 50 predictions in The Rough Guide to the Future Wondering what s really in store for the human race Nanotechnology and gene enhancements solar power and carbon capture Or oil shocks water wars food shortages and mass extinction The Rough Guide to the Future cuts a clear path through the jungle of scientific research and political debate steering you around the prophets of doom and the utopian visionaries to take you on a tour of the likeliest possibilities for the rest of this century and beyond It covers 50 predictions

from the world's leading futurologists and chronicles predictions from the past along with visions of the future You'll find out where we go from here with **The Rough Guide to the Future** **Population 10 Billion** Danny Dorling, 2013-06-20 Before May 2011 the top demographics experts of the United Nations had suggested that world population would peak at 9.1 billion in 2100 and then fall to 8.5 billion people by 2150 In contrast the 2011 revision suggested that 9.1 billion would be achieved much earlier maybe by 2050 or before and by 2100 there would be 10.1 billion of us What's more they implied that global human population might still be slightly rising in our total numbers a century from now So what shall we do Are there too many people on the planet Is this the end of life as we know it Distinguished geographer Professor Danny Dorling thinks we should not worry so much and that whatever impending doom may be around the corner we will deal with it when it comes In a series of fascinating chapters he charts the rise of the human race from its origins to its end point of population 10 billion Thus he shows that while it took until about 1988 to reach 5 billion we reached 6 billion by 2000 7 billion eleven years later and will reach 8 billion by 2025 By recording how we got here Dorling is able to show us the key issues that we face in the coming decades how we will deal with scarcity of resources how our cities will grow and become more female why the change that we should really prepare for is the population decline that will occur after 10 billion **Population 10 Billion** is a major work by one of the world's leading geographers and will change the way you think about the future Packed full of counter intuitive ideas and observations this book is a tool kit to prepare for the future and to help us ask the right questions

**Feeding Britain** Tim Lang,2020-03-26 How does Britain get its food Why is our current system at breaking point How can we fix it before it is too late British food has changed remarkably in the last half century As we have become wealthier and more discerning our food has Europeanized pizza is children s favourite food and internationalized we eat the world s cuisines yet our food culture remains fragmented a mix of mass ultra processed substances alongside food as varied and good as anywhere else on the planet This book takes stock of the UK food system where it comes from what we eat its impact fragilities and strengths It is a book on the politics of food It argues that the Brexit vote will force us to review our food system Such an opportunity is sorely needed After a brief frenzy of concern following the financial shock of 2008 the UK government has slumped once more into a vague hope that the food system will keep going on as before Food they said just required a burst of agri technology and more exports to pay for our massive imports Feeding Britain argues that this and other approaches are short sighted against the public interest and possibly even strategic folly Setting a new course for UK food is no easy task but it is a process this book urges that needs to begin now
