Perform Informatiebeleid:

Films that Work Vinzenz Hediger, Patrick Vonderau, 2009 Industriële films worden gezien als een apart filmgenre van de twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT&T. Daarnaast hebben belangrijke regisseurs zoals Buster Keaton, John Grierson en Alain Resnais aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. *Films that Work* is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht. *Work and Organizational Psychology* José María Peiró, 1995 This text presents a selection of contributions to the Sixth European Congress of Work and Organizational Psychology held in Alicante, Spain, in April 1993, some of which have been previously published in the *European Work and Organizational Psychologist*. The contributions selected to appear in this volume focus on some of the principal questions scholars and professionals concerned with work and organizational psychology are tackling in Europe. The range of topics, theoretical approaches, methodologies and orientations discussed illustrate the richness and variety of ideas currently studied in the discipline. The topics addressed in this text have a clear significance for the current European scene of work and organizational psychology. Although they are not the only ones, the areas discussed present important trends and interests within the discipline. The main sections include contributions which deal with psychological characteristics and processes of individuals at work, work experiences and their relationship with psychological well-being, the study of work entry and work socialization, the study of teamwork in organizations, the study of leadership in organizations, new forms of work and organization and the phenomenon of work in a social context. This book is intended to be of relevance and interest to both academics and practitioners in the field of work and organizational psychology.

Brinkman's catalogus van boeken en tijdschriften, 2001 With 1901, 1910, 1956, 1960 Repertorium is bound. Brinkman's Titelcatalogus van de gedurende 1901, 1910, 1956, 1960. Title varies slightly. **Brinkman's cumulatieve catalogus van boeken**, 2001 Voorts een alfabetische lijst van Nederlandsche boeken in België uitgegeven. **Technology, Organizations and Innovation: Towards 'real virtuality'?** Ian McLoughlin, David Preece, Patrick Dawson, 2000 An authoritative collection of leading critical and contemporary writings published in the field of technology and organizations. The set spans a 50-year time period, taking the reader from the first and most influential papers from the early 1950s through to some recent publications which address contemporary and emerging debates in the field at the dawn of the 21st century. Each of the 4 volumes has a particular focus upon this area of research and scholarship: the early debates, theories, paradigms and concepts; critical empirical studies and emerging themes; and future debates. The editors provide an introduction to and overview of the themes, debates, perspectives, theories and paradigms which characterize this area of organization studies and

set out a route map to help guide the reader through the four volumes **Boekblad** ,1996-04 *Telecommunication*

Annaflavia Bianchi, Giuseppe Richeri, 1996 The book presents an updated dialogue between researchers and analysts on policy relevant telecommunication issues and public and private sector decision makers engaged in making telecommunication policy It focuses on the two major issues of sectoral convergence looking at the new challenges to regulation in Europe and at company strategies for alliance and competition at the national and global level and competition discussing interconnection of both local long distance incumbent new entrant and universal service definition in a liberalised framework as well as the new dynamics between network and service competition with special concern on the role played by national telecom operators Each theme concerns both corporate strategy in the international environment and public policy responses to shifting realities Dynamics and Change in Organizations H. W. M. Gazendam, René Jorna, R.S. Cijssouw, 2003-07-31 Organizational Semiotics occupies an important niche in the research community of human communication and information systems It opens up new ways of understanding the functioning of information and information resources in organised behaviour In recent years a number of workshops and conferences have provided researchers and practitioners opportunities to discuss their theories methods and practices and to assess the benefits and potential of this approach Literature in this field is much in demand but still difficult to find so we are pleased to offer a third volume in the miniseries of Studies in Organizational Semiotics This book is based on the papers and discussions of the fifth workshop on Organizational Semiotics held in Delft June 13 15 2002 hosted by Groningen University and Delft Technical University in the Netherlands The topic of this workshop was the dynamics and change in organizations The chapters in this book reflect recent developments in theory and applications and demonstrate the significance of Organizational Semiotics to information systems human communication and coordination organizational analysis and modelling In particular it provides a framework that accommodates both the technical and social aspects of information systems The mini series presents the frontier of the research in this area and shows how the theory and techniques enhance the quality of work on information systems **Variety Controls Variety** Hendrik Wilhelm Martin Gazendam, 1993 **The Art of Management, Deel 1 Strategie en Structuur** Dr. M.A. Nieuwenhuis, **The Availability of Spatial and Environmental Data in the European Union** Katleen Janssen, 2010-01-01 Because the original and essential value of spatial data data that refer to specific geographical locations or areas lies in environmental decision making such data mostly originate in the public sector and are made available to people **Policy Analysis in the Netherlands** Frans van Nispen, Peter Scholten, 2018-03-01 This comprehensive study part of the International Library of Policy Analysis edited by Iris Geva May and Michael Howlett brings together for the first time a systemic overview of policy analysis activities in the Netherlands The Netherlands is internationally regarded as one of the front runners of policy analysis and evaluation in Europe This book provides a much needed overview of developments in policy analysis in both academia and practice at various levels of governance It brings

together contributions from key scholars as well as from professionals in the field The book captures the diversity of modes of policy analysis which have evolved since the 1970s Above all it provides an overview of the current state of affairs and is as such suitable for anyone who is interested in governance and performance Features of the ILPA series include a systematic study of policy analysis systems by government and non governmental actors a history of the country s policy analysis empirical case studies and a comparative overview a key reference collection for research and teaching in comparative policy analysis and policy studies

Availability of Spatial and Environmental Data in the European Union Cristos Velasco San Martín, 2010-07-09 The Availability of Spatial and Environmental Data in the European Union *Traveling Heritages* Saskia Wieringa, 2008 In the context of our increasingly globalized and digitalized world libraries and archives are experiencing major changes The methods used internationally to collect cultural heritage and other historical material are shifting as new media have added important innovative tools for gathering preserving and sharing information around the globe In light of our increasingly multicultural societies and the expanding digital divide we need new and more inclusive approaches to the collection of cultural heritage This means that critical reflection on both the contents of collections and methods of acquisition is crucial The International Information Center and Archives for the Womens Movement IIAV in Amsterdam provides a case study in how to approach these issues It considered such questions as how to make optimal use of new media and whose histories should be represented in its archives In *Traveling Heritages* international and national heritage experts from academic library and archival professions reflect upon these questions offering new perspectives on documenting womens histories

Economic Titles/abstracts ,1990 **Open** Nederlandse Vereniging van Bibliothecarissen, Documentalisten en Literatuuronderzoekers, 1996 *Recruiting Immigrant Workers: The Netherlands 2016* OECD, 2016-09-06 This review examines labour migration to the Netherlands assessing how it contributes to the strategic development of sectors and employment in regions It explores the determinants for retaining high skilled migrants and for the integration of international graduates into the Dutch labour market

Geographic Data and the Law Katleen Janssen, Joep Crompvoets, 2012 Understanding the legal challenges relating to spatial data information SDI *StarBriefs Plus* Andre Heck, 2004-03-31 With about 200 000 entries *StarBriefs Plus* represents the most comprehensive and accurately validated collection of abbreviations acronyms contractions and symbols within astronomy related space sciences and other related fields As such this invaluable reference source and its companion volume *StarGuides Plus* should be on the reference shelf of every library organization or individual with any interest in these areas Besides astronomy and associated space sciences related fields such as aeronautics aeronomy astronautics atmospheric sciences chemistry communications computer sciences data processing education electronics engineering energetics environment geodesy geophysics information handling management mathematics meteorology optics physics remote sensing and so on are also covered when justified Terms in common use and or of general interest have also been included where appropriate
