The ancient animals of this age mysteriously became extinct and disappeared from our earth but left their fossilized remains behind Fossils have been discovered constantly in human history the Chinese thought they were dragon bones and Europeans thought they were the bones of biblical monsters Luckily the scientific study of ancient animals began in between 1815 1824 with the discovery of an Iguanodon fossil Since then ancient animals and dinosaurs have been discovered all over the world Their immense size strange shapes and wonderful natures make them inherently worthy of interest The study of ancient animals requires depth of imagination analytical skills and thought The many unanswered questions about their lives behavior and disappearance provoke the curious to seek answers and ask even more questions I hope this book fuels your imagination and makes you want to learn even more about dinosaurs and the ancient animals which preceded them I hope you learn to appreciate the value of your study and that you bring a spirit of openness and wonder on your journey back to an ancient age that began The North American Review James Russell Lowell, 1929 Vols 227 230 no 2 include Stuff before the age of the dinosaurs and nonsense v 5 6 no 8 Jan 1929 Aug 1930 Genetics P.
