PUBLISHER: TEKTIME A. L. Morton and the Radical Tradition James Crossley, 2025-01-21. This is the first book-length treatment of the life and thought of the Communist intellectual A. L. Morton (1903-1987) who pioneered studies of utopianism, radical history and English national identity. Morton is now best known for *A People's History of England* (1938) and *The English Utopia* (1952) but his output was vast and he was once widely read in socialist circles and beyond. He published on the English Revolution, Chartism, the emergence of the British labour movement, the legacy of utopianism in working class movements, Arthurian legends, Shakespeare, the Brontë sisters, Robert Owen, William Morris, millenarianism, imperialism and much more. Through extensive archival work, including recently released secret service files and a close reading of Morton's publications, this book shows how Morton was a key influence on the famed generation of British Marxist historians associated with the postwar Communist Party. Historians Group often anticipating their more celebrated findings. This book analyses the interrelated significance of Morton's political work and his role within the Communist Party of Great Britain at crucial points in its history. The book further functions then as a story of English socialism and Communism during the Cold War. *Naval Reservist*, 1946 *Directives, publications, reports index* United States Coast Guard, 1982 *Mobile Media Learning* et al., Christopher Holden, 2015. This book is an inspirational message about what is possible and practical in the name of learning through mobile media. We present stories from a diverse set of educators, a microcosm of the landscape of mobile media learning. Each author has found a way to create something new and beautiful in their own world. And though their results are exceptional, their surroundings are not. Most are not experts in high technology nor highly equipped. They get as far as they do by using what is at hand, in part by making use of accessible, free and open source software. To provide both a deeper look into how these projects operate and a practical resource for those who want to join in, this book addresses most of these tools individually as well. Our detailed, down-to-earth accounts will not only be legible to newcomers but refreshingly forthright to those anxious to better understand educational experiments connecting learning and mobile media.
